Challenges

1 What significant economic, social or environmental obstacles have you encountered in the production, procurement, use and/or promotion of CSPO and what efforts did you make to mitigate or resolve them?

Obstacles A large part of the palm oil that is used by Vandemoortele are derivatives. Market availability of especially SG RSPO certified derivatives is still limited and price premiums are high. For some of our smaller customers (artisan bakers and foodservice), the certification process is too complex and not cost effective. In some countries there is a growing demand for palm-free products. Efforts Vandemoortele is in frequent dialogue with suppliers to monitor the availability of more complex palm oil derivatives. Vandemoortele promotes the use of CSPO by its customers and assists smaller customers to find their way to certification. Vandemoortele explains its customers asking for palm-free that moving away from (sustainable) palm oil and replacing it by other oils and fats does not necessarily benefit the environment.

2 In addition to the actions already reported in this ACOP how has your organization supported the vision of RSPO to transform markets in other ways? (e.g. Funding; Engagement with key stakeholders; Business to business education/outreach)

Vandemoortele informs its customers about sustainable palm and promotes the use of CSPO. Vandemoortele is a founding member of the Belgian, French Alliance for Sustainable Palm oil and the Spanish Alliance for Sustainable Palm Oil. Vandemoortele contributes and participates in the Dutch Task Force on Sustainable Palm Oil , the European Palm Oil Alliance and the European Sustainable Palm Oil Advocacy Group.
