

<b>About your organisation</b>			
<b>Name of the organisation:</b>	Johnson & Johnson Consumer Europe Division of Cilag GmbH		
<b>Membership number:</b>			
<b>What is the primary activity or product of your organisation?</b>	Johnson & Johnson Consumer Companies, Inc. is a manufacturer and marketer of consumer healthcare products. Our primary businesses are women's health, oral care, wound care, skin care and baby care. Our products include formulations such as toiletries and cosmetics, engineered materials such as absorbents, and OTC pharmaceuticals. Johnson & Johnson Consumer Companies, Inc. is a member of the Johnson & Johnson family of companies.	<b>Other, please specify</b>	
<b>In addition to your activities as a consumer goods manufacturers, does your company have significant activities in any other parts of the palm oil supply chain?</b>	None		
<b>Organisation profile</b>	Caring for the world one person at a time...inspires and unites Johnson & Johnson (J&J). We embrace research and science, bringing to market innovative ideas, and products and services that advance the health and well-being of people around the world. Our Family of Companies comprise the following business segments: Consumer Healthcare products, Medical Devices & Diagnostics, and Pharmaceuticals. Approximately 117,000 employees at more than 250 Johnson & Johnson operating companies work for our company. We are guided by the principles of Our Credo, created by General Robert Wood Johnson in 1943. These principles address our patients and consumers, our employees, the environment and communities we are part of and finally the shareholder. They are guiding us through to today. Our touch point with palm oil lies in our Consumer Healthcare segment. Our baby, beauty and nutritional products do contain oleo-chemicals, e.g. surfactants, stearins and esters that are fractionated or derived from palm oil. We do not buy any palm oil directly but purchase chemical ingredients that are derivatives of palm oil, e.g. surfactants, emollients, conditioners, esters and emulsifiers. We estimate that the current usage of palm oil in the chemical ingredients that we purchase is approximately 58,000 tons per year. This makes us a minor participant in the palm oil market; nevertheless we take our responsibility seriously. We continue to monitor and measure the usage of palm oil in our chemical ingredients.		
<b>Please list any related company operating within the palm oil supply chain, which is linked through more than 51% ownership. E.g. an affiliate, a majority shareholder in a joint venture, a subsidiary or a parent company</b>	None	<b>Member of the RSPO</b>

<b>Further information on your organisation's commitment to sustainable palm oil</b>	<p>Our commitment and membership of the RSPO, including other industry coalitions, is endorsed at the most senior levels in our business and has been shared with Johnson &amp; Johnson employees and other stakeholders. We continue to seek ways to engage and build capacity of certified sustainable palm oil (CSPO) across the value chain, and actively encourage all our suppliers that produce materials using palm oil as a starting material to join the RSPO and to procure and use sustainable palm oil. We have created a dedicated team to execute this strategy, which aims to ensure, by 2015, that only certified sustainable palm oil is used in the ingredients that make up our products.</p> <p>As part of the Global Consumer Palm Oil Sourcing Strategy we work both internally with our companies and externally with our supply chain to meet this objective, supporting a number of specific projects to increase supply of CSPO through increasing small-holder yields, improve the usage of land and or support projects to increase global awareness around sustainable palm oil.</p>
