No

Public commitment relating to the GHG emissions report:

--

21 Do you publicly report the GHG emissions of your operations? - Existing operations (as per Criterion 5.6)

--

Report the GHG emissions of operations - existing operations (as per Criterion 5.6)

--

21 Do you publicly report the GHG emissions of your operations? - Expected emissions associated with new plantings

--

**Report the GHG emissions of operations - Expected emissions associated with new plantings
(as per Criterion 7.8)**

--

Reasons for Non-Disclosure of Information

22 If you have not disclosed any of the above information, please indicate the reasons why

Other

Reasons

Not related to smallholder producer groups. However, we are compiling the relevant information to enable us to report on GHG by 2014.

Challenges

1. Significant economic, social or environmental obstacles

Securing core funding to expand the technical support to our various models across Malaysia, or even overseas. Our model for smallholder support also departs from existing models and thus it is difficult for donors to appreciate the impact of this innovation to smallholders. We are working on extending the communication of our work through RSPO events in order to improve the understanding of our model.

There is also a challenge to translate certified products into sales revenue that can cover the cost of certification and technical support. This is an area that needs more attention or to identify potential partners that can help us develop a more realistic financial model to continue to support the smallholders.

2. How would you qualify RSPO standards as compared to other parallel standards?

--

Cost Effective:

No

Robust:

No

Simpler to Comply to:

No

3. How has your organization supported the vision of RSPO to transform markets?

We are active in assisting different supply chain actors find solutions to either meet the RSPO standards or to find ways to resolve bottlenecks in the supply of RSPO products into the supply chain.
