Organisations

Affiliates

Operational Profile

1.1. What are the main activities of your organisation?

The objective of AOMG is to represent the oleochemical industry wherever necessary. It also seeks to promote the formation of reliable and responsible production of oleochemical without prejudicing normal competition between companies and countries.

1.2. Does your organization use and/or sell any palm oil?

No.

1.3. Activities undertaken to promote sustainable palm oil, the RSPO and/or members in the reporting period

among_undertaken_activities

1.4. What percentage of your organization's overall activities focus on palm oil?

100%

1.5. Did members of your staff participate in RSPO working groups/taskforces in the reporting period?

Yes

1.6. Do you have any collaborations with the industry players/private sector to support them in the market transformation towards CSPO?

No

If yes, please give details:

--

If not, please explain why:

This is done by the individual companies.

1.7. How is your work on palm oil funded?

Membership subscription contributed by our members.

Actions for Next Reporting Period

2.1. Outline actions that will be taken in the coming year to promote sustainable palm oil.

We will continue to encourage our members to be SCCS certified and sell more RSPO certified products.

Challenges

1 What significant economic, social or environmental obstacles have you encountered in the production, procurement, use and/or promotion of CSPO and what efforts did you make to mitigate or resolve them?

High cost of certification. Customer demand for RSPO products is still low.

2 In addition to the actions already reported in this ACOP how has your organization supported the vision of RSPO to transform markets in other ways? (e.g. Funding; Engagement with key stakeholders; Business to business education/outreach)

Continue to encourage members to be SCCS certified.

 - Supply Chain Associate
-

1.3 Membership number

8-0199-17-000-00

1.4 Membership category

Affiliate

1.5 Membership sector

Associations

Affiliates

Operational Profile

1.1. What are the main activities of your organisation?

ANIAME, the NATIONAL ASSOCIATION OF EDIBLE OILS AND SHORTENING PRODUCERS, is the representative organisation for the most important Mexican oilseed crushers, oil palm FFB processors and vegetable oils and fats refiners.

Representation of the Mexican vegetable oil sector is the main function of ANIAME. This representative task has been quite relevant to boost the Mexican oils & fats industry's growth within a context of trade and economic liberalisation. We promote an environment of free trade and higher productivity, competitiveness and quality standards – always from the point of view of strengthening the link among members of the oilseeds & oil palm value chain.

1.2. Does your organization use and/or sell any palm oil?

No

1.3. Activities undertaken to promote sustainable palm oil, the RSPO and/or members in the reporting period

among_undertaken_activities

1.4. What percentage of your organization's overall activities focus on palm oil?

50%

1.5. Did members of your staff participate in RSPO working groups/taskforces in the reporting period?

Yes

1.6. Do you have any collaborations with the industry players/private sector to support them in the market transformation towards CSPO?

Yes

If yes, please give details:

As their representative organization we are participating in the working group to elaborate the National Interpretation of RSPO Principles and Criteria for Mexico. This way ANIAME is trying to give palm oil industry players a better scheme to reach their RSPO certification.

If not, please explain why:

--

1.7. How is your work on palm oil funded?

As an association all the work made by ANIAME is funded by fees paid by our members. As part of an annual budget approved by our Board of Directors.

Actions for Next Reporting Period

2.1. Outline actions that will be taken in the coming year to promote sustainable palm oil.

In 2018, ANIAME will continue to be part of the Mexican working group which is elaborating the National Interpretation of RSPO P&C for Mexico.

Also, we are promoting the creation of a National Standard based on RSPO P&C, with the help of some government agencies in order to support small oil palm producers, so they can reach certification as soon as possible, given the 2020 deadline offered by some of the big consumers of palm oil in Mexico and all over the world.

1 What significant economic, social or environmental obstacles have you encountered in the production, procurement, use and/or promotion of CSPO and what efforts did you make to mitigate or resolve them?

As we mentioned before, one of the main problems to get the RSPO certification is that Mexico is composed of thousands of small oil palm growers. As a first solution we think having a NI for Mexico will help to deal with this challenge, as the NI is encouraged by the Ministry of Agriculture and it will create a better environment to establish a relationship between palm oil producers and these small oil palm growers or their organizations. Palm oil processors are also promoting this NI to have a better chance to reach their certification. ANIAME has in 2020, the date big palm oil users have established as a deadline.

2 In addition to the actions already reported in this ACOP how has your organization supported the vision of RSPO to transform markets in other ways? (e.g. Funding; Engagement with key stakeholders; Business to business education/outreach)

ANIAME is trying to involve the Mexican government agencies related to agribusiness production and care of the environment in order they adopt and promote RSPO principle and criteria as a way to reach a sustainable agriculture production in our country. We are trying to do this via MOUs between Mexican government agencies and RSPO or inviting them to be observers in the NI process or trying to include the RSPO approach in national standards. We think this is necessary to reach small oil palm growers, so they understand the significance to be certified in order to not be let aside of market requirements...

1.5. Did members of your staff participate in RSPO working groups/taskforces in the reporting period?

Yes

1.6. Do you have any collaborations with the industry players/private sector to support them in the market transformation towards CSPO?

Yes

If yes, please give details:

Promote RSPO with the actors of palm oil sector

If not, please explain why:

--

1.7. How is your work on palm oil funded?

Our work is funded by the members Financial contributions

Actions for Next Reporting Period

2.1. Outline actions that will be taken in the coming year to promote sustainable palm oil.

- Support the RSPO P&C public consultation in Ivory Coast
- Support the work of Solidaridad regarding the small farmers group certification process
- Follow up on Ivory Coast National Interpretation and promote RSPO principles and criteria for sustainable palm oil

Challenges

1 What significant economic, social or environmental obstacles have you encountered in the production, procurement, use and/or promotion of CSPO and what efforts did you make to mitigate or resolve them?

Economic: -Low incomes from palm oil for small holders -Poor life quality for those small holders Social: - land use ownership under challenge for small holders Environnement: -Best practices issues -Deforestation for new plantations issues

2 In addition to the actions already reported in this ACOP how has your organization supported the vision of RSPO to transform markets in other ways? (e.g. Funding; Engagement with key stakeholders; Business to business education/outreach)

AIPH support the RSPO visison through many actions: -Promoting the RSPO national interpretation P&C for Cote d'Ivoire -Sensiblize all small holders to RSPO P&C. - Promotion of education for members on RSPO P& C - Suggestion of RSPO best practices in small farmers training programs

Operational Profile

1.1. What are the main activities of your organisation?

BCS ÖKO GARANTIE COLOMBIA S.A.S. belongs to the KIWA GROUP INT.

Kiwa BCS - the number 1 - for worldwide certification of organic products according to different standards

Kiwa BCS certifies more than 450.000 farmers and more than 1.000 processing businesses in import and export worldwide. Our services cover all vital agricultural cultivations and the majority of all relevant processing industries. Several market leaders are among the companies serviced by Kiwa BCS.

We extend our services permanently to serve you best: 1-Stop-Shop with the certifier number 1: Kiwa BCS

Kiwa BCS Öko-Garantie offers a seal for BCS certified companies, in order to help them distinguish their products in the market. The BCS seal is an easily recognizable sign for the customer to identify high quality organic products.

Kiwa BCS Öko-Garantie collaborates with organisations well-known in the field of organic production both inland and abroad. I.e.:

QAI (USA)
Organica (YU)
Soil Association (GB)
Gää (DE)
Biokreis (DE)
ACI Australian Certified Organic
Bio Suisse (CH)
Naturland (DE)
COFCC (China)
KRAV (S)
Bioland (DE)
CAAQ Quebec
Hungaria Öko Garancia (HU)
Biokontroll Hungária Kht. (HU)
Austria Bio Garantie (AT)
Agrovet (AT)
Demeter (DE)

Also, for you, Kiwa BCS Öko-Garantie is the right partner for up-to-date and reliable investigations, information and contacts.

1.2. Does your organization use and/or sell any palm oil?

We are a Certification Accredited Body, since the 26th March by ASI.
Our scope includes P&C and SCC Certification in LatAm, specifically: Brazil, Colombia, Costa Rica, Dominican Republic, Ecuador, El Salvador, Guatemala, Honduras, Mexico, Panama and Peru.

1.3. Activities undertaken to promote sustainable palm oil, the RSPO and/or members in the reporting period

amorg_undertaken_activities

1.4. What percentage of your organization's overall activities focus on palm oil?

10%

1.5. Did members of your staff participate in RSPO working groups/taskforces in the reporting period?

No

1.6. Do you have any collaborations with the industry players/private sector to support them in the market transformation towards CSPO?

No

If yes, please give details:

--

If not, please explain why:

As CAB, we must maintain our independence with the processes developed by the industry / private sector players in their process of transforming the market towards the RBSA.

The most we can do is to guide them towards the implementation of the standards, explaining the issues that generate confusion. Without entering the consulting or assessing, our participation is more informative and educational., and obviously, with the certification and surveillance audits.

1.7. How is your work on palm oil funded?

Initially, the KIWA BCS group assigned a fund to defray the expenses associated with the accreditation process, once obtained the accreditation, we depend on the sales we make for the provision of the service.

Actions for Next Reporting Period**2.1. Outline actions that will be taken in the coming year to promote sustainable palm oil.**

Our idea is to carry out training throughout Latin America regarding the RSPO Certification and the elements that must be considered to achieve certification.

That is part of our marketing plan and service expansion.

Challenges

1 What significant economic, social or environmental obstacles have you encountered in the production, procurement, use and/or promotion of CSPO and what efforts did you make to mitigate or resolve them?

The main problems detected are related to the difficulty that is presented to the companies to implement the Principles and Criteria; On the one hand there is the issue of costs; on the other hand, the transition processes that were presented between 2015 and 2017 with the mandatory nature of LUCA and RaCP, because there was no response from companies that required their studies to be evaluated and approved. This delayed a lot the certificaicón processes and also demotivated many others.

2 In addition to the actions already reported in this ACOP how has your organization supported the vision of RSPO to transform markets in other ways? (e.g. Funding; Engagement with key stakeholders; Business to business education/outreach)

As we expressed previously, from our role as CAB, our commitment is mainly focused on the dissemination and development of the benefits of the RSPO and the CSPO. And for that we put an availability our mass media

1.4. What percentage of your organization's overall activities focus on palm oil?

50%

1.5. Did members of your staff participate in RSPO working groups/taskforces in the reporting period?

No

1.6. Do you have any collaborations with the industry players/private sector to support them in the market transformation towards CSPO?

Yes

If yes, please give details:

Member in FONAP

If not, please explain why:

--

1.7. How is your work on palm oil funded?

We invoice our consultancy work in regard to RSPO to our clients.

Actions for Next Reporting Period

2.1. Outline actions that will be taken in the coming year to promote sustainable palm oil.

We plan to increase number of RSPO trainings and to support more clients to become RSPO certified.

Challenges

1 What significant economic, social or environmental obstacles have you encountered in the production, procurement, use and/or promotion of CSPO and what efforts did you make to mitigate or resolve them?

Purchase of some raw materials, e.g. aromatics, as RSPO certified is still difficult for our clients and constrains production of more certified goods. Negative promotion of palm oil by some NGOs encourages supply chain actors to substitute palm oil by raw materials.

2 In addition to the actions already reported in this ACOP how has your organization supported the vision of RSPO to transform markets in other ways? (e.g. Funding; Engagement with key stakeholders; Business to business education/outreach)

Engagement with key stakeholders

If not, please explain why:

Does not apply

1.7. How is your work on palm oil funded?

Because every palm oil company pays the studies with self funds

Actions for Next Reporting Period**2.1. Outline actions that will be taken in the coming year to promote sustainable palm oil.**

We are currently working on workshops for building capacities on the sustainability department staff of the palm oil companies. The aim is that they serve as practical guidelines for the implementation of management and monitoring strategies for HCV

Challenges

1 What significant economic, social or environmental obstacles have you encountered in the production, procurement, use and/or promotion of CSPO and what efforts did you make to mitigate or resolve them?

Cost of the studies in general. Also, the lack of knowledge of the companies in this topic, that reflects in their weak institutional framework to carry on properly this new challenges and requirements. what we have done so far is counseling and performing the required studies by the companies.

2 In addition to the actions already reported in this ACOP how has your organization supported the vision of RSPO to transform markets in other ways? (e.g. Funding; Engagement with key stakeholders; Business to business education/outreach)

Cala Consultants Inc. was formed to provide consultancy and advisory services to agro-based industries in the oilseeds industry, particularly Oil Palm and all its derivatives. We are a multi-disciplinary consulting and engineering firm serving public, private and international agencies. Our track record spans over 40 years serving customers in Latin America, Africa, Asia and Europe. We provide consultancy services for RSPO P&C and SCC. Additionally, we have a team of contract professional auditors serving SCC, working through third party Certification Bodies.

1.2. Does your organization use and/or sell any palm oil?

No.

1.5. Did members of your staff participate in RSPO working groups/taskforces in the reporting period?

Yes

1.6. Do you have any collaborations with the industry players/private sector to support them in the market transformation towards CSPO?

Yes

If yes, please give details:

As contract auditors, we support private sector players in attesting to the sustainable supply chain certification. As industry consultants, we advise growers, processors in their requirements towards certification.

If not, please explain why:

--

1.7. How is your work on palm oil funded?

Self-funded.

Actions for Next Reporting Period**2.1. Outline actions that will be taken in the coming year to promote sustainable palm oil.**

Our hope is to formally continue promoting RSPO P&C and the use of RSPO certified palm oil with our employees, stakeholders (customers) and consumers, whether processors or end-consumer.

We will continue to actively participate in RSPO endorsed events and continue to work with our stakeholders in promoting the sustainable sourcing of palm oil.

Challenges

1 What significant economic, social or environmental obstacles have you encountered in the production, procurement, use and/or promotion of CSPO and what efforts did you make to mitigate or resolve them?

Our main obstacles has been in research and data availability of sustainable palm oil products and derivatives. We continue to constantly monitor the rspo.org site, continuously engage with industry leaders, reaching out to RSPO stakeholders.

2 In addition to the actions already reported in this ACOP how has your organization supported the vision of RSPO to transform markets in other ways? (e.g. Funding; Engagement with key stakeholders; Business to business education/outreach)

Cala Consultants Inc. continues to support RSPOs' vision by continuously engaging in research, particularly SCC markets in North America. We reach out to our stakeholders through constant contact, research divulgation and engaging opportunities in RSPO endorsed events in LATAM and North America.

Operational Profile

1.1. What are the main activities of your organisation?

CIRAD is the French agricultural research and international cooperation organization working for the sustainable development of tropical and Mediterranean regions.

CIRAD (French Agricultural Research Centre for International Development) is a public establishment (EPIC) under the joint authority of the Ministry of Higher Education and Research and the Ministry of Foreign Affairs and International Development. Its activities concern the life sciences, social sciences and engineering sciences, applied to agriculture, the environment and territorial management.

Its work centres on six main topics: food security, climate change, natural resource management, reduction of inequalities and poverty alleviation.

CIRAD works with its partners in southern countries to generate and pass on new knowledge to support agricultural development. It puts its scientific and institutional expertise at the disposal of policymakers in those countries and global debates on the main issues concerning agriculture. It also supports French scientific diplomacy operations.

CIRAD has one main objective: to build sustainable farming systems capable of feeding ten billion human beings by 2050 while preserving the environment.

It considers that to develop long term and draft appropriate public policies, societies have to participate in generating the knowledge they need. That development through research relies on the ability of the countries concerned to build a suitable higher education and research system that is supported by the authorities but remains independent.

On a local and a global level, through its long-term partnerships, it contributes to the development of farming systems that benefit all, and particularly smallholders, who make up the majority of farmers.

In this way, it responds to the global challenges of food security and climate change, and also the 17 UN Sustainable Development Goals (SDGs) and the Paris agreement on climate change.

Training, dissemination of information and knowledge and innovation sharing naturally complement agricultural CIRAD's research mandate by giving its partners and development players the means to make the choices incumbent upon them.

Diploma and vocational training in southern countries is an essential part of this, and relies on a commitment on the part of each and every researcher.

CIRAD is also a major player in talks between Europe and the South. It belongs to numerous European and international networks, and facilitates access for its partners in the South to EU programmes and their involvement in international scientific cooperation networks.

CIRAD has a network of partners on three continents, and 14 regional offices, from which it works with more than 100 countries. Its long-term partnership strategy centres on 23 platforms in partnership for research and training (dPs), associating 200 organizations in southern countries, to which 200 of its researchers are assigned (100 in Africa, 50 in Asia and 50 in South America).

In France, it provides the national and global scientific communities with extensive research and training facilities, primarily in Montpellier and the French overseas regions.

CIRAD is a member of two French consortiums: Agreenium/IAVFF and AllEnvi .

CIRAD in figures

- A staff of 1650, including 800 researchers.
- Joint operations with more than 100 countries and 200 organizations.
- Three scientific departments: Biological Systems (BIOS), Performance of Tropical Production and Processing Systems (PERSYST), and Environment and Societies (ES).
- 33 research units.
- 14 regional offices throughout the world.
- Some 30 collective research Tools open to partners from the South and from Europe.
- Almost 5 million euros spent on PhD courses.
- More than 400 PhD students supervised each year, 60% of them from southern countries.
- International Masters courses set up with grandes écoles or universities in the South.
- 800 researchers and technicians from all over the world received and trained each year.
- An annual budget of 220 million euros in 2018.

1.2. Does your organization use and/or sell any palm oil?

NO

1.3. Activities undertaken to promote sustainable palm oil, the RSPO and/or members in the reporting period

among_undertaken_activities

1.4. What percentage of your organization's overall activities focus on palm oil?

10%

1.5. Did members of your staff participate in RSPO working groups/taskforces in the reporting period?

Yes

1.6. Do you have any collaborations with the industry players/private sector to support them in the market transformation towards CSPO?

Yes

If yes, please give details:

Private partenrsip is the backbone of Cirad collaborative work on sustaiable commodity chains.

Its current major partners in the oil palm industry are:

FELDA (Malaysia)

Universiti Putra Malaysia (Malaysia)

PT SMART (Indonesia)

PT Socfindo (Indonesia)

PT Austindo (Indonesia)

Daemeter (Indonesia)

SIAT (Ghana and Nigeria)

If not, please explain why:

--

1.7. How is your work on palm oil funded?

CIRAD budget is 60% from French Government and 40% from R&D contracts with third parties (both public and private).

Actions for Next Reporting Period**2.1. Outline actions that will be taken in the coming year to promote sustainable palm oil.**

Finalizing the construction of the SALSA platform and circulating its Roadmap and Consortium Agreement will be the major target for 201_, which means reinforcing partnership links between Cirad and Universities,

Research Institutions and plantation companies in South East Asia for advanced research on sustainable commodity chains, including palm

oil.

Collaboration with French Alliance for Sustainable Palm Oil will provide a basis for long term research programs focusing on smallholders practices and livelyhood.

Cirad officers will continue to actively participate in RSPO working groups

Challenges

1 What significant economic, social or environmental obstacles have you encountered in the production, procurement, use and/or promotion of CSPO and what efforts did you make to mitigate or resolve them?

Not Applicable

2 In addition to the actions already reported in this ACOP how has your organization supported the vision of RSPO to transform markets in other ways? (e.g. Funding; Engagement with key stakeholders; Business to business education/outreach)

Producing research books and articles, policy briefs and communications is part of Cirad mandate. Cirad also interacted with French Government and European Institutions about taxation of palm oil imports. The aim is again to provide decision-makers with science-based evidence on key figures and practices along the commodity chain.

Operational Profile

1.1. What are the main activities of your organisation?

I.- The main activity of Comexpalma being a National representative instance in the integral development of the oil palm production chain in Mexico, seeking greater and better coordination of producers and industry and in general of the protagonists of the palm oil production chain, with the federal, state, and municipal governments and financial, academic, research or any other institutions that have a direct or indirect relationship with the aforementioned chain.

II.- Strive to increase productivity and oil palm production, as well as promoting the growth of the crop and improving the commercialization and industrialization of fruit and oil, making this a profitable, competitive activity with criteria of sustainability and protection of the environment;

III, - Participate in the definition and orientation of programs and supports for its associates in coordination with the Federal, State, and Municipal Governments, as well as private institutions and organizations;

IV.- Perform all kinds of acts and operations and subscribe credit instruments in the terms of the General Law of Credit Titles and Operations and all types of documents including granting of powers and faculties, as well as generally leading to any type of activities that are necessary for the fulfillment of the social purpose of the company.

V.-Purchase, lease, sublease and administration of all kinds of personal and real property, which are necessary for the realization of the object of the association.

VI- Promote the integration of State Councils of the Oil Palm, as part of the operational structure of the National Council itself.

VII, - The other objectives that the General Assembly determines in future sessions.

VIII.- Form part of the National Committee of Oil Palm System-Product in accordance with the Law of Sustainable Rural Development.

IX.- Promote technological development both in agricultural production and in the industrialization of oil palm.

X.- Develop technical assistance and training programs for agricultural producers.

XI.- Promote and manage financing that allows members to obtain loans in conditions to boost their growth and productivity.

1.2. Does your organization use and/or sell any palm oil?

none

1.3. Activities undertaken to promote sustainable palm oil, the RSPO and/or members in the reporting period

among_undertaken_activities

1.4. What percentage of your organization's overall activities focus on palm oil?

100%

1.5. Did members of your staff participate in RSPO working groups/taskforces in the reporting period?

No

1.6. Do you have any collaborations with the industry players/private sector to support them in the market transformation towards CSPO?

Yes

If yes, please give details:

Looking for alternatives that facilitate the process such as the Clean Industry Program of the Environmental Attorney's Office.

If not, please explain why:

--

1.7. How is your work on palm oil funded?

Managing support from the Federal Government through programs directed towards oil palm cultivation, and participating in the definition and orientation of said programs and supports for its associates in coordination with the Federal, State, and Municipal Governments.

Actions for Next Reporting Period

2.1. Outline actions that will be taken in the coming year to promote sustainable palm oil.

Continue the activities related to the National Interpretation of RSPO principles and criteria for Mexico.

Preparing several RSPO Principles and Criteria courses for oil palm producers in Mexico.

Continue promoting of the Principles and Criteria of RSPO in government events related to the agricultural sector and especially with the oil palm chain in Mexico

Challenges

1 What significant economic, social or environmental obstacles have you encountered in the production, procurement, use and/or promotion of CSPO and what efforts did you make to mitigate or resolve them?

In Mexico, the consumption of palm oil, as in the rest of the world, has been increasing and has gained ground compared to other oils, but in reality there have been no significant problems as economic and social, since the environmental area The Federal Attorney for Environmental Protection (PROFEPA) undertook the National Environmental Audit Program (PNAA) which aims to evaluate the processes of a company that could generate environmental risks, in compliance with applicable regulations of international parameters and good practices and improve the environmental performance of companies, so that it is superior to current environmental legislation. With these actions, the responsibility of oil palm companies registered in the PNAA is demonstrated. To achieve viability and consolidation for the palm oil production chain, the industry has started with a series of projects that have included the achievement of some distinctive features such as Socially Responsible Company, Family Responsible Company, and Clean Industry, certifications work are as a basis for our final objective: achieving certification before the RSPO so that palm oil production consolidation in Mexico be as environmentally and socially responsible as it can be.

2 In addition to the actions already reported in this ACOP how has your organization supported the vision of RSPO to transform markets in other ways? (e.g. Funding; Engagement with key stakeholders; Business to business education/outreach)

We seek the participation of the government in the reunions of the working group of national interpretation of principles and criteria of RSPO for Mexico, so that the sector of small producers feels protected by government's support during the interpretation process.

No.

1.3. Activities undertaken to promote sustainable palm oil, the RSPO and/or members in the reporting period

among_undertaken_activities

1.4. What percentage of your organization's overall activities focus on palm oil?

95%

1.5. Did members of your staff participate in RSPO working groups/taskforces in the reporting period?

Yes

1.6. Do you have any collaborations with the industry players/private sector to support them in the market transformation towards CSPO?

No

If yes, please give details:

--

If not, please explain why:

I offer training only.

1.7. How is your work on palm oil funded?

Delegate fees only.

Actions for Next Reporting Period**2.1. Outline actions that will be taken in the coming year to promote sustainable palm oil.**

Continue to improve my training courses.

Challenges

1 What significant economic, social or environmental obstacles have you encountered in the production, procurement, use and/or promotion of CSPO and what efforts did you make to mitigate or resolve them?

The book and Claim suppl chain model is strongly supported and cheaper to implement than the other supply chain models. The RSPO Trademark is identical for all supply chain models, with the exception of the tag "Certified", "Mixed", "50% Mixed" and "Credits". The general public do not know what the differences are and the use of "Credits" may be beneficial to small holders but it is definitely discouraging the use of IP, SG and MB.

2 In addition to the actions already reported in this ACOP how has your organization supported the vision of RSPO to transform markets in other ways? (e.g. Funding; Engagement with key stakeholders; Business to business education/outreach)

Through very strong and passionate promotion of the RSPO.

1.4 Membership category

Affiliate

1.5 Membership sector

Organisations

Affiliates**Operational Profile****1.1. What are the main activities of your organisation?**

Decarbonize's vision is to catalyse the transition to a sustainable, increasingly circular and low carbon economy by:

- advising major organisations on improving the sustainability of their products, supply chains and operations
- developing networks between early stage clean technology solution providers, potential investors, and major business users
- working towards good governance that underpins sustainable and responsible practices.

Decarbonize's Managing Director is currently the Retailers Palm Oil Group representative on the RSPO Board of Governors.

1.2. Does your organization use and/or sell any palm oil?

No

1.3. Activities undertaken to promote sustainable palm oil, the RSPO and/or members in the reporting period

among_undertaken_activities

1.4. What percentage of your organization's overall activities focus on palm oil?

10%

1.5. Did members of your staff participate in RSPO working groups/taskforces in the reporting period?

Yes

1.6. Do you have any collaborations with the industry players/private sector to support them in the market transformation towards CSPO?

Yes

If yes, please give details:

Retail Palm Oil Transparency Coalition engages first importers into Europe, processors and traders, to support market transformation towards certified sustainable palm oil.

If not, please explain why:

--

1.7. How is your work on palm oil funded?

By Retailers Palm Oil Group members.

Actions for Next Reporting Period**2.1. Outline actions that will be taken in the coming year to promote sustainable palm oil.**

1. Retailer Palm Oil Group member requirements to be reflected in RSPO production and supply chain standards and guidelines
2. Maintain up to date knowledge on other developments in palm oil sustainability relevant to retail PO supply chains
3. Accelerate market transition towards sustainable palm oil
4. Support Retail Brand risk management in relation to palm oil
5. Maintain good management, administration and communication practices
6. Increase RPOG membership, impact or leverage to accelerate the global adoption of sustainable palm oil.

Challenges

1 What significant economic, social or environmental obstacles have you encountered in the production, procurement, use and/or promotion of CSPO and what efforts did you make to mitigate or resolve them?

The Retailers Palm Oil Group representative campaigned for RSPO to: > provide accurate data on all market uptake of CSPO, taking account of all sales of CSPO by any scheme. Unfortunately there has been limited progress on accurate reporting of market uptake, led by the Board and Trade & Traceability Standing Committee; and > produce a market directory to indicate availability of CSPO ingredients for suppliers. Unfortunately there has been no progress on the proposed market directory, led by the Communications & Claims Standing Committee.

2 In addition to the actions already reported in this ACOP how has your organization supported the vision of RSPO to transform markets in other ways? (e.g. Funding; Engagement with key stakeholders; Business to business education/outreach)

1.6. Do you have any collaborations with the industry players/private sector to support them in the market transformation towards CSPO?

Yes

If yes, please give details:

La Federation, agremia a productores y extractoras, a los cuales damos apoyo y soporte en la implementación de los P&C RSPO, Realizamos Diagnosticos para Identificar Oportunidades de Mejora Realizamos planes de Acciones Correctivas para Cierre de Brechas Capacitamos a los Colaboradores Tenemos Alianzas con compradores y traders, para apoyar a pequeños productores en AVC, Formación de Auditores Internos

If not, please explain why:

--

1.7. How is your work on palm oil funded?

Nuestros agremiados, pagan un fee anual para ser parte de la Federación y tenemos alianzas con compradores finales de aceite de palma. Con esas fuentes, financiamos los diferentes proyectos que realizamos.

Actions for Next Reporting Period

2.1. Outline actions that will be taken in the coming year to promote sustainable palm oil.

Contamos con un programa de trabajo que incluye.
Elaboración de Guías, paso a paso para dar cumplimiento a cada unos de los criterios del Estándar de P&C y SCC
Elaboración de Videos y Animaciones sobre Buenas Practicas Agro-Industriales, Ambientales, Sociales, Procedimiento de Nuevas Plantaciones, Que es un Código de Etica.
Impartiremos 22 sesiones de Capacitaciones en 5 estados del país, para cubrir temas como AVC, Manejo seguro de plaguicidas, Que es RSPO, Manejo de desechos

Challenges

1 What significant economic, social or environmental obstacles have you encountered in the production, procurement, use and/or promotion of CSPO and what efforts did you make to mitigate or resolve them?

Retos para el Sector Palmero Mexicano Aumentar la Productividad Lograr la Sustentabilidad a través del estándar RSPO Fortalecimiento del Gremio Hemos realizado alianzas con compradores finales de aceite y traders para poder contar con recursos para promover la implementación del estándar de RSPO y realizar un AVC regional.

2 In addition to the actions already reported in this ACOP how has your organization supported the vision of RSPO to transform markets in other ways? (e.g. Funding; Engagement with key stakeholders; Business to business education/outreach)

FEMEXPALMA, desde su nacimiento ha realizado alianzas con Universidades de la zona y el Colegio de Post Graduados para realizar distintas líneas de investigación que aporte al desarrollo sustentable del cultivo. Se realizó el primero congreso palmero mexicano, donde reunimos a los sectores; Gubernamentales, Privados, ONGs, Educativos y Representantes de RSPO.

1.5 Membership sector

Organisations

Affiliates

Operational Profile

1.1. What are the main activities of your organisation?

FEDIOL represents the interests of the EU crushers and vegetable oil refiners towards European Institutions. Industries affiliated to FEDIOL (180 plants belonging to approximately 35 companies across 17 EU Member States) are crushing oilseeds and refining crude vegetable oils, both locally grown and imported. FEDIOL addresses issues of common interest to our companies and does it generally in horizontally manner. Our working groups deal with food and feed safety, food and feed regulatory issues, nutrition, trade, environment and sustainability, agricultural policy and supply chain issues.

1.2. Does your organization use and/or sell any palm oil?

FEDIOL does neither use nor sell palm oil.

1.3. Activities undertaken to promote sustainable palm oil, the RSPO and/or members in the reporting period

among_undertaken_activities

1.4. What percentage of your organization's overall activities focus on palm oil?

10%

1.5. Did members of your staff participate in RSPO working groups/taskforces in the reporting period?

Yes

1.6. Do you have any collaborations with the industry players/private sector to support them in the market transformation towards CSPO?

Yes

If yes, please give details:

As European organisation, we discuss and coordinate with our members and member companies. We have cooperation with 4 other European Associations under the ESPOAG, European Sustainable Palm Oil Advocacy Group. Our joint objective is to rebalance the debate on palm oil in Europe. We are raising in this platform all questions relative to sustainability, nutrition and food safety of palm oil in Europe, including how to achieve up-take of sustainable palm oil. ESPOAG is also having regular contacts and exchanges with several national palm oil coalitions or alliances in the EU and maintains contact and working relations with EPOA (European Palm Oil Alliance), Brussels-based NGOs active in the sustainability area and ESPO Europe.

If not, please explain why:

--

1.7. How is your work on palm oil funded?

FEDIOL is an association funded through membership contributions. Our activities, which are decided on a yearly basis by the FEDIOL General Assembly are mostly horizontal and even if action can be focused when needed on rapeseed, soybeans, sunflower seed oil or palm oil (for example), there is no isolated budget to cover these specific actions; the common funds serve all identified priorities.

Actions for Next Reporting Period

2.1. Outline actions that will be taken in the coming year to promote sustainable palm oil.

FEDIOL will continue undertaking the monitoring of sustainable palm oil that is used by its member companies. As part of the European Sustainable Palm Oil Advocacy Group (ESPOAG), it will continue addressing issues arising around the up-take of sustainable palm oil. With the release by the European Commission of a feasibility study on a possible action plan against deforestation and a study on palm oil production and consumption, looking at the different certification systems, FEDIOL together with its partners in ESPOAG, will join the debate and the likely consultation on policy measures. Our interventions will have as objective to ensure that policy measures that may be envisaged are supportive and not counter-productive for existing efforts to promote sustainable supply streams.

Challenges

1 What significant economic, social or environmental obstacles have you encountered in the production, procurement, use and/or promotion of CSPO and what efforts did you make to mitigate or resolve them?

The European Commission's legislative work on setting maximum values for Glycidyl esters has to some extent calmed down the anti-palm campaigners that were vocal on food safety grounds. These are process contaminants arising during refining of vegetable oils when they are exposed to high temperatures with higher incidence in palm oil. Efforts made by our industry achieved a substantial reduction through implemented mitigation techniques. Following the release of the up-dated EFSA risk assessment early 2018, the EU regulatory activity with regard to the other substances, 3-MCPD esters, is on-going. In the course of 2017, more anti-palm campaigners have been vocal in the debate on the EU Renewable Energies Directive, notably in the European Parliament. The rejection arises because of the association of palm oil and deforestation, despite the fact that palm oil used for biodiesel must be certified sustainable. Our action aimed at preventing the differentiation between feedstock, notably through the use of iLUC (indirect Land-Use Change) factors and maintaining existing investments instead of phasing out conventional biofuels, including palm oil.

2 In addition to the actions already reported in this ACOP how has your organization supported the vision of RSPO to transform markets in other ways? (e.g. Funding; Engagement with key stakeholders; Business to business education/outreach)

FEDIOL has continued, on its own or jointly with ESPOAG partners, to exchange with other stakeholders and with the European Institutions about ways and means to support efforts towards increasing sustainable supply streams. This has been done through meetings, organisation and speaking in events, such as EPOC (European Palm Oil Conference) taking place in November 2017, publication of documents, positions, press releases.....

Within the activities contemplated in our organization, we have:

1. Environmental and human rights education
 2. Care and conservation of forests and water resources.
 3. Realization of social and environmental impact assessments
- Four

1.2. Does your organization use and/or sell any palm oil?

Fundacion Proyeccion Eco-Social, is a non-profit organization that promotes good social and environmental practices. We do not use, nor do we market palm oil

1.3. Activities undertaken to promote sustainable palm oil, the RSPO and/or members in the reporting period

among_undertaken_activities

1.4. What percentage of your organization's overall activities focus on palm oil?

50%

1.5. Did members of your staff participate in RSPO working groups/taskforces in the reporting period?

Yes

1.6. Do you have any collaborations with the industry players/private sector to support them in the market transformation towards CSPO?

No

If yes, please give details:

--

If not, please explain why:

No alliances have been created with companies in the palm oil sector, we are in the process of building them.

1.7. How is your work on palm oil funded?

The project is financed with support from international cooperation of the Norwegian government, in conjunction with the National Wildlife Federation, University of Wisconsin

Actions for Next Reporting Period**2.1. Outline actions that will be taken in the coming year to promote sustainable palm oil.**

1. Support the promotion of palm oil free of deforestation
2. Generate strategies of respect for human rights and the environment.
3. Promote food security through productive projects

Challenges

1 What significant economic, social or environmental obstacles have you encountered in the production, procurement, use and/or promotion of CSPO and what efforts did you make to mitigate or resolve them?

The impacts that we have found in the oil palm sector have been found: 1. Decrease in water resources due to drainage channels
2. Informality in the labor hiring system. Work has been carried out so that the plantations have good agricultural practices.

2 In addition to the actions already reported in this ACOP how has your organization supported the vision of RSPO to transform markets in other ways? (e.g. Funding; Engagement with key stakeholders; Business to business education/outreach)

La Fundación Proyección Eco-Social has been linked in different areas such as TFA 2020 chapter Colombia, we have participated in the public consultation of updating of the principles and criteria.

--

If not, please explain why:

Just started last year working in this business area. GFA will check collaborations with the industry players/private sector to support them in the market transformation towards CSPO since GFA is a Certification body and does not provide any consultancy to Certificate Holders.

1.7. How is your work on palm oil funded?

Income from supply chain certification services.

Actions for Next Reporting Period**2.1. Outline actions that will be taken in the coming year to promote sustainable palm oil.**

1. We will attend at the RSPO RT event in Paris in June 2017
 2. Encourage companies to come into RSPO certification
 3. Try to become a member of one of the RSPO working groups.
 4. Conducting RSPO SCC audits
 5. Participation in European CB Meetings
-

Challenges

1 What significant economic, social or environmental obstacles have you encountered in the production, procurement, use and/or promotion of CSPO and what efforts did you make to mitigate or resolve them?

N/A : Certification Body

2 In addition to the actions already reported in this ACOP how has your organization supported the vision of RSPO to transform markets in other ways? (e.g. Funding; Engagement with key stakeholders; Business to business education/outreach)

None, because we are a Certification Body and not directly involved in the RSPO supply chain.

1.1. What are the main activities of your organisation?

Youth leadership program

1.2. Does your organization use and/or sell any palm oil?

No, our licensed manufacturers use palm oil.

1.3. Activities undertaken to promote sustainable palm oil, the RSPO and/or members in the reporting period

among_undertaken_activities

1.4. What percentage of your organization's overall activities focus on palm oil?

10%

1.5. Did members of your staff participate in RSPO working groups/taskforces in the reporting period?

No

1.6. Do you have any collaborations with the industry players/private sector to support them in the market transformation towards CSPO?

No

If yes, please give details:

--

If not, please explain why:

It is not part of our main activities as a youth leadership program.

1.7. How is your work on palm oil funded?

Within our general budget

Actions for Next Reporting Period

2.1. Outline actions that will be taken in the coming year to promote sustainable palm oil.

Continued support of our licensed manufacturers in their efforts.
Continued proactive and reactive education of our membership through web and other channels.

Challenges

1 What significant economic, social or environmental obstacles have you encountered in the production, procurement, use and/or promotion of CSPO and what efforts did you make to mitigate or resolve them?

N/A

2 In addition to the actions already reported in this ACOP how has your organization supported the vision of RSPO to transform markets in other ways? (e.g. Funding; Engagement with key stakeholders; Business to business education/outreach)

Engaging with Girl Scout members and licensed manufacturers

Organisations

Affiliates**Operational Profile****1.1. What are the main activities of your organisation?**

Trade in Chemical Materials

1.2. Does your organization use and/or sell any palm oil?

No

1.3. Activities undertaken to promote sustainable palm oil, the RSPO and/or members in the reporting period

among_undertaken_activities

1.4. What percentage of your organization's overall activities focus on palm oil?

10%

1.5. Did members of your staff participate in RSPO working groups/taskforces in the reporting period?

No

1.6. Do you have any collaborations with the industry players/private sector to support them in the market transformation towards CSPO?

No

If yes, please give details:

--

If not, please explain why:

Have minimal information on CSPO and our contact with upstream palm oil suppliers is none. However, we keep encouraging enquiries on CSPO products.

1.7. How is your work on palm oil funded?

n/a as we are not involved in the supply chain.

Actions for Next Reporting Period**2.1. Outline actions that will be taken in the coming year to promote sustainable palm oil.**

Will look and encourage use for more products from RSPO members as well as CSPO products. If enquiring on new products, will first enquire on CSPO products

Challenges

1 What significant economic, social or environmental obstacles have you encountered in the production, procurement, use and/or promotion of CSPO and what efforts did you make to mitigate or resolve them?

CSPO awareness is still limited and the cost difference to non-CSPO products are still great. We are trying to promote as much CSPO product source as possible and work with customers on CSPO awareness.

2 In addition to the actions already reported in this ACOP how has your organization supported the vision of RSPO to transform markets in other ways? (e.g. Funding; Engagement with key stakeholders; Business to business education/outreach)

When engaging suppliers and customers, check on RSPO certified materials with them and let them know about RSPO website for information

1.4. What percentage of your organization's overall activities focus on palm oil?

80%

1.5. Did members of your staff participate in RSPO working groups/taskforces in the reporting period?

No

1.6. Do you have any collaborations with the industry players/private sector to support them in the market transformation towards CSPO?

Yes

If yes, please give details:

Our work with POIG encourages companies to become RSPO certified, as POIG requires at least 50% RSPO certification.

If not, please explain why:

--

1.7. How is your work on palm oil funded?

Client fees and international foundations

Actions for Next Reporting Period**2.1. Outline actions that will be taken in the coming year to promote sustainable palm oil.**

We will continue our advisory and secretariat work

Challenges

1 What significant economic, social or environmental obstacles have you encountered in the production, procurement, use and/or promotion of CSPO and what efforts did you make to mitigate or resolve them?

The drive towards boycotts in the EU is very troubling and we are working with various civil society partners in communicating to opinion leaders why a boycott is a very short-term solution,

2 In addition to the actions already reported in this ACOP how has your organization supported the vision of RSPO to transform markets in other ways? (e.g. Funding; Engagement with key stakeholders; Business to business education/outreach)

We are always promoting sustainable palm oil with companies in the retailer and manufacturer sectors.

10%

1.5. Did members of your staff participate in RSPO working groups/taskforces in the reporting period?

Yes

1.6. Do you have any collaborations with the industry players/private sector to support them in the market transformation towards CSPO?

Yes

If yes, please give details:

Providing training courses focused on RSPO and informing clients regarding RSPO updates.

If not, please explain why:

Due to the nature of IBD as a certification body, we want to avoid misunderstandings concerning conflicts of interests. Therefore we are more focused on trainings and courses that introduce the RSPO to industry players/private sectors of the market, mainly in Brazil.

1.7. How is your work on palm oil funded?

Certification and related services.

Actions for Next Reporting Period**2.1. Outline actions that will be taken in the coming year to promote sustainable palm oil.**

Supporting RSPO events (mainly in Latin America), promoting and sponsoring training courses and providing certification services.

Challenges

1 What significant economic, social or environmental obstacles have you encountered in the production, procurement, use and/or promotion of CSPO and what efforts did you make to mitigate or resolve them?

None that requires special attention.

2 In addition to the actions already reported in this ACOP how has your organization supported the vision of RSPO to transform markets in other ways? (e.g. Funding; Engagement with key stakeholders; Business to business education/outreach)

Business to business education and sponsoring RSPO related events in Latin America.

Yes

If yes, please give details:

MPOB, MPOC and MPOCC.

If not, please explain why:

--

1.7. How is your work on palm oil funded?

Certification assessment fees.

Actions for Next Reporting Period**2.1. Outline actions that will be taken in the coming year to promote sustainable palm oil.**

To ensure that OP Growers & Certificate Holders do comply with the requirements of RSPO and continue to maintain credible implementations of the RSPO requirements each year.

Challenges

1 What significant economic, social or environmental obstacles have you encountered in the production, procurement, use and/or promotion of CSPO and what efforts did you make to mitigate or resolve them?

Market misconception that certification of CSPO and related products has not made significant changes on the ground level ie production at plantations. Changing of market perception that CSPO has made positive significant impacts on the livelihood of the communities and producing countries is still the long term challenge. Consumers and consuming countries still need to be committed to responsible procurement and be willing to pay the premium for sustainably produced palm oil and its products.

2 In addition to the actions already reported in this ACOP how has your organization supported the vision of RSPO to transform markets in other ways? (e.g. Funding; Engagement with key stakeholders; Business to business education/outreach)

Being actively engaged in the awareness and promotion of certifications to RSPO standards and encouraging consumer markets to support the use of CSPO and its related products.

-

Challenges

1 What significant economic, social or environmental obstacles have you encountered in the production, procurement, use and/or promotion of CSPO and what efforts did you make to mitigate or resolve them?

New markets e.g. Eastern Europe apply for RSPO certification. Cost of RSPO membership and RSPO certification is an issue for developing these markets . ISACert BV has qualified local auditing staff to be more cost effective. First demands form the Turkish market in 2017.

2 In addition to the actions already reported in this ACOP how has your organization supported the vision of RSPO to transform markets in other ways? (e.g. Funding; Engagement with key stakeholders; Business to business education/outreach)

Operational Profile

1.1. What are the main activities of your organisation?

Our organization is a nonprofit civil association of private law, which groups in Peru 10 organizations related to the cultivation, processing of crude oil extraction and oil palm derivatives.

Among the main activities developed by our organization are:

Agremiar to the legal persons related to the cultivation of palm, process of extraction of crude oil and derivatives.

Represent and defend the interests of our associates before the national and international, regional and local governments, public and private entities in the value chain of the oil palm agroindustry and in the commercial activity, financial system and other sector that is related to the sector.

Contribute with the national, regional and local government to the generation of studies and solutions to the productive, technical, economic, social and environmental problems to contribute to the improvement of competitiveness under the guidelines of development of economic, social and environmental sustainability.

Contribute to research, generation of statistical information and specialized studies on the cultivation, production, industrial transformation, marketing and consumption of oil palm and derivatives and others that contribute to improving sector competitiveness.

Formulate development policies with the national government to promote the expansion of the oil palm agroindustry under the economic, social and environmental sustainability approaches.

1.2. Does your organization use and/or sell any palm oil?

The JUNPALMA is a national union that represents the Peruvian palm sector, does not produce or market palm oil or derivatives.

1.3. Activities undertaken to promote sustainable palm oil, the RSPO and/or members in the reporting period

amorg_undertaken_activities

1.4. What percentage of your organization's overall activities focus on palm oil?

100%

1.5. Did members of your staff participate in RSPO working groups/taskforces in the reporting period?

Yes

1.6. Do you have any collaborations with the industry players/private sector to support them in the market transformation towards CSPO?

Yes

If yes, please give details:

ALICORP, an industrial company that refines oil and commercializes food products, helped finance the organization of the RSPO Theoretical and Practical Workshop held in the Pongo city of Caynarachi, San Martín Region. Likewise, there was financial support from the partner organizations of JUNPALMA PERÚ.

The advocacy process through training to stakeholders linked to the oil palm chain in Peru for the adaptation of the conventional palm oil production system to sustainable production with certification is done only with the support of the private sector.

If not, please explain why:

--

1.7. How is your work on palm oil funded?

JUNPALMA finances its operational activities with the contributions of its associates. The promotion of RSPO certification in Peru is considered as activities to be carried out as foreseen in the Annual Operating Plan, which is approved at the beginning of the year by the Board of Directors and by the General Assembly.

As a result of the training on RSPO certification carried out in 2017, the company Industria de Palma Aceitera de Loreto and San Martin (INDUPALSA) foresees at the beginning of 2018 to be part of the RSPO and initiate its actions to adapt its industrial processes and its chain of supply towards RSPO certification.

Actions for Next Reporting Period

2.1. Outline actions that will be taken in the coming year to promote sustainable palm oil.

In 2018, awareness-raising programs for producers and training for agricultural technicians and the industries of the partner organizations of JUNPALMA will be continued to promote RSPO certification.

In the second quarter, work will begin on the National Interpretation of the Principles and Criteria of the RSPO, which will be updated in 2019. For these actions, technical collaboration will be managed by specialized entities of the Peruvian Government and civil society.

The objective of the promotion and impact actions on the RSPO certification is to promote the sustainable expansion of the palm in Peru and to influence the entrance to the RSPO of another industrial companies partner of the JUNPALMA.

CHALLENGES

Use this section of the report to highlight the challenges you would like to raise with the palm oil and sustainable palm oil products certified by the RSPO.

Challenges

1 What significant economic, social or environmental obstacles have you encountered in the production, procurement, use and/or promotion of CSPO and what efforts did you make to mitigate or resolve them?

In Peru, companies registered with the RSPO that adapt their processes for certification face high costs for studies for remediation and compensation and given that the requirements for certification are strict for producers of small and medium-scale production, the process It gets slow and expensive. In the social issue, the protagonism of native communities against the advance of oil palm encouraged by various instances of the Government and civil society that acts more because of ignorance is a restriction for the sector.

2 In addition to the actions already reported in this ACOP how has your organization supported the vision of RSPO to transform markets in other ways? (e.g. Funding; Engagement with key stakeholders; Business to business education/outreach)

In 2017, the participation of more companies and producers towards the RSPO certification was continued. In the next year, it is planned to prepare a guide to adopt the principles and criteria of the RSPO and another to promote financing for certification in producers of small and medium-scale production.

Organisations

Affiliates**Operational Profile****1.1. What are the main activities of your organisation?**

The National Edible Oils Distributors Association (NEODA) is a trade association representing all the major UK Oils and fat refiners, distributors. The association works on behalf of its members to establish and monitor industry standards by means of the Guarantee of Confidence scheme as well as a Oil Monitoring system.

NEODA has also been a strong advocate for the Promotion of the RSPO and its standards, supported by its refiner members and by direct presentations and updates from the RSPO.

1.2. Does your organization use and/or sell any palm oil?

No there is no physical oil traded.

1.3. Activities undertaken to promote sustainable palm oil, the RSPO and/or members in the reporting period

among_undertaken_activities

1.4. What percentage of your organization's overall activities focus on palm oil?

%

1.5. Did members of your staff participate in RSPO working groups/taskforces in the reporting period?

No

1.6. Do you have any collaborations with the industry players/private sector to support them in the market transformation towards CSPO?

Yes

If yes, please give details:

We have helped educate members, including the distributors on the RSPO and helped support them to becoming members and to be also supply chain certified, were appropriate. NEODA has been actively support RSPO for at least 9-10 years.

If not, please explain why:

--

1.7. How is your work on palm oil funded?

The association is funded by our membership but we fortunately have leading refiners providing their time and support including, AAK, New Britain Palm Oil, ADM, Cargill.

Actions for Next Reporting Period**2.1. Outline actions that will be taken in the coming year to promote sustainable palm oil.**

There will be a RSPO update given on behalf of the RSPO at our April Annual General Meeting.

Challenges

1 What significant economic, social or environmental obstacles have you encountered in the production, procurement, use and/or promotion of CSPO and what efforts did you make to mitigate or resolve them?

We are a trading association so we are not involved directly in this field and have not had many issues in the promotion of this but it has been difficult to involve companies who only supply a small amount of RSPO products. This has been addressed by the group membership scheme and this will continue to be discussed.

2 In addition to the actions already reported in this ACOP how has your organization supported the vision of RSPO to transform markets in other ways? (e.g. Funding; Engagement with key stakeholders; Business to business education/outreach)

NEODA will continue to hold educational seminars to members and non members and the agenda given by experienced industry professionals and we will always include a section on the RSPO.

1.5 Membership sector

Individuals

Affiliates

Operational Profile

1.1. What are the main activities of your organisation?

The NRSC gathers leaders in the beauty industry (fragrances and cosmetics) who have collectively committed to developing and implementing responsible corporate practices across all domains – economic, social, and environmental – along raw material supply chains, from source to finished product.

1.2. Does your organization use and/or sell any palm oil?

No

1.3. Activities undertaken to promote sustainable palm oil, the RSPO and/or members in the reporting period

among_undertaken_activities

1.4. What percentage of your organization's overall activities focus on palm oil?

8%

1.5. Did members of your staff participate in RSPO working groups/taskforces in the reporting period?

No

1.6. Do you have any collaborations with the industry players/private sector to support them in the market transformation towards CSPO?

Yes

If yes, please give details:

We work with our members to encourage physical transformation (beyond CSPO: no peat, no deforestation, no exploitation). That includes raising awareness among the members and follow up key palm products suppliers on their progress regarding sustainability.

If not, please explain why:

--

1.7. How is your work on palm oil funded?

NRSC sustainable palm oil program is funded by membership fees.

Actions for Next Reporting Period

2.1. Outline actions that will be taken in the coming year to promote sustainable palm oil.

The workgroup set three objectives for the year 2018:

- To support and challenge direct NRSC members suppliers progress regarding the sustainability of their PO/PKO & derivatives supply chains;
- To assess NRSC impact on members;
- To reinforce cosmetics and fragrance industry presence in the palm debate.

To reach these objectives, active contribution from the members are necessary. The partnership with TFT will continue in 2018.

The 2018 activities include:

- Update list of suppliers followed up by sponsors on behalf of NRSC palm workgroup;
- Collect direct NRSC supplier traceability information;
- Evaluate level of action undertaken by direct NRSC members suppliers to transform the supply chain;
- Suggest improving strategies for NRSC members direct suppliers;
- Evaluate evolution in volumes of certified products bought by members and suppliers since 2015;
- Evaluate level of action undertaken by NRSC members to transform their supply chain;
- Update collective commitment;
- Contribute more actively in RSPO through the P&C review

Challenges

1 What significant economic, social or environmental obstacles have you encountered in the production, procurement, use and/or promotion of CSPO and what efforts did you make to mitigate or resolve them?

The NRSC has encountered some obstacles regarding RSPO-certified sustainable palm derivatives. The majority of palm footprint for the cosmetics and fragrance industry involves the use of derivatives of palm oil and palm kernel oil. It is our experience that there is limited commercial availability of certified palm derivatives for our industry. We support RSPO Principles and Criteria and have also established the NRSC Sustainable Palm Oil Sourcing Principles through extensive multistakeholder engagement and believe our responsibility is to source palm-derived ingredients in a manner that does not contribute to deforestation, protects peatlands and respects human rights in our sourcing communities. We have invested in partnerships amongst NRSC, The Forest Trust and palm-derivative suppliers to collaborate and drive transformation within the fragrance and cosmetic industry.

2 In addition to the actions already reported in this ACOP how has your organization supported the vision of RSPO to transform markets in other ways? (e.g. Funding; Engagement with key stakeholders; Business to business education/outreach)

no

Operational Profile

1.1. What are the main activities of your organisation?

NES NATURALEZA does Sustainability trainings and implementation of the sustainable standard. We also do research and studies related to the sustainability of the palm oil sector in different countries. We promote sustainable practices among the palm oil supply chain

1.2. Does your organization use and/or sell any palm oil?

No

1.3. Activities undertaken to promote sustainable palm oil, the RSPO and/or members in the reporting period

among_undertaken_activities

1.4. What percentage of your organization's overall activities focus on palm oil?

90%

1.5. Did members of your staff participate in RSPO working groups/taskforces in the reporting period?

Yes

1.6. Do you have any collaborations with the industry players/private sector to support them in the market transformation towards CSPO?

Yes

If yes, please give details:

We did trainings with smallholders and mills on the ABC of sustainability in Latam.
We support some mills and traders to go under RSPO certification.
We do baselines and action plan to close the gaps between the mills and RSPO standards.
We inform on the requirements in the export markets, so the producers know that sustainability is nowadays mandatory.
We promote RSPO among the supplychain.

If not, please explain why:

--

1.7. How is your work on palm oil funded?

By private companies

Actions for Next Reporting Period

2.1. Outline actions that will be taken in the coming year to promote sustainable palm oil.

We will continue on our main focus which is create awareness on the significance of sustainability for the supply chain and markets.
We will continue supporting the implementation of the RSPO standards

Challenges

1 What significant economic, social or environmental obstacles have you encountered in the production, procurement, use and/or promotion of CSPO and what efforts did you make to mitigate or resolve them?

Every company is very concern on the cost of becoming RSPO certified. Thru my experience I keep mentioning that is not so costly as they imagine and I give them several examples of how they could comply with the standard at a normal cost

2 In addition to the actions already reported in this ACOP how has your organization supported the vision of RSPO to transform markets in other ways? (e.g. Funding; Engagement with key stakeholders; Business to business education/outreach)

Training, informing, pushing people to participate in RSPO public consultation and others.

Organisations

Affiliates**Operational Profile****1.1. What are the main activities of your organisation?**

Proforest helps people manage the world's natural resources sustainably. We are an independent, international organisation that works alongside producers, industry, governments, NGOs and communities to help them understand and address their sustainability challenges, bridge their differences and arrive at effective, integrated solutions. Our expertise delivers sustainable natural resource management – from policy, investment and procurement to production on the ground. Our vision is to achieve Sustainable Livelihoods in Sustainable Landscapes, and our approach to responsible sourcing aims to contribute to this transformation agenda.

1.2. Does your organization use and/or sell any palm oil?

No

1.3. Activities undertaken to promote sustainable palm oil, the RSPO and/or members in the reporting period

among_undertaken_activities

1.4. What percentage of your organization's overall activities focus on palm oil?

50%

1.5. Did members of your staff participate in RSPO working groups/taskforces in the reporting period?

Yes

1.6. Do you have any collaborations with the industry players/private sector to support them in the market transformation towards CSPO?

Yes

If yes, please give details:

As detailed in section 1.1 and 1.3, part of our work involves collaboration with private-sector actors in the palm oil industry, providing them with support services towards achieving production and sourcing of CSPO.

If not, please explain why:

--

1.7. How is your work on palm oil funded?

Through private companies or through grants, depending on the nature of the work.

Actions for Next Reporting Period**2.1. Outline actions that will be taken in the coming year to promote sustainable palm oil.**

Continuation, development and expansion of activities as listed in Section 1.3.

Challenges

1 What significant economic, social or environmental obstacles have you encountered in the production, procurement, use and/or promotion of CSPO and what efforts did you make to mitigate or resolve them?

Proforest continue to seek alignment and collaboration on the various parallel workstreams on sustainable palm oil policy compliance for multiple clients. We pursue an approach that aims to deliver effective improvements in sustainability performance in specific supply chains, together with coordinated approaches to achieve landscape-level and/or sector-wide impact.

2 In addition to the actions already reported in this ACOP how has your organization supported the vision of RSPO to transform markets in other ways? (e.g. Funding; Engagement with key stakeholders; Business to business education/outreach)

As listed in section 1, Proforest's work specializes in developing and implementing practical solutions to obstacles surrounding CSPO and CSPKO, at all stages of the supply chain. This includes engagement with and support for companies at all stages of the supply chain (including producers and FMCG companies), programme work to support inclusion of smallholders in supply chains, and various training and outreach events.

1.5. Did members of your staff participate in RSPO working groups/taskforces in the reporting period?

No

1.6. Do you have any collaborations with the industry players/private sector to support them in the market transformation towards CSPO?

Yes

If yes, please give details:

Our core business is to equip our clients with knowledge and skills to achieve environmental and social sustainability, including market transformation of palm oil companies towards CSPO: (1) partial compliances through independent assessment, technical assistance, training, coaching and consultancy-advisory; (2) full compliance through technical assistance, training and coaching of RSPO P&C (and ISPO P&C).

If not, please explain why:

--

1.7. How is your work on palm oil funded?

Our work is mainly funded by the private sector (palm oil companies) for our professional services. Several works are funded by RSPO: a series of LUCA independent reviews, LUCA Guidance for RSPO Remediation and Compensation Procedures.

Actions for Next Reporting Period**2.1. Outline actions that will be taken in the coming year to promote sustainable palm oil.**

We will continue what we have been doing and expand to serve new clients, regions and countries. We are planning to set up new product of services in the areas of: (1) HCV management and monitoring (training, facilitating and implementing), (2) HCS management and monitoring (training, facilitating and implementing), (3) integrating FPIC in the company's operations (training, coaching), (4) stakeholder engagement and social management (training, facilitating, coaching), (5) conservation program for meeting the compensation liability (planning, facilitating, implementing).

Challenges

1 What significant economic, social or environmental obstacles have you encountered in the production, procurement, use and/or promotion of CSPO and what efforts did you make to mitigate or resolve them?

The most tangible and significant obstacle in the production, procurement, use and/or promotion of CSPO we encountered in 2017, is that the increasingly demanding RSPO requirements make it less attractive for companies to become or stay as RSPO members, and to develop areas which have too many restrictions to be economically viable. The net result will be detrimental to many of these areas, which will still be developed by non-members and local communities, without sufficient environmental and social standards. In addition, the biased public opinion on oil palm industry in general, the hesitation of companies to be transparent fearing negative publication, the RSPO requirements becoming more demanding, complex and more expensive every year. Our efforts related to these obstacles have been limited to education and awareness efforts towards the RSPO, our clients, local communities, Indonesian Government, NGOs and the general public.

2 In addition to the actions already reported in this ACOP how has your organization supported the vision of RSPO to transform markets in other ways? (e.g. Funding; Engagement with key stakeholders; Business to business education/outreach)

Aksenta has been active in HCV related works and issues: the first consultancy initiated HCV assessment in Indonesia in 2007, become HCVRN member since 2016, active in HCVRN ALS training and workshop since then, encourage its associates to be HCVRN ALS Licensed Assessors, active participant of the Indonesian HCV Network (JNKTI) since the establishment of this network. Aksenta has also been actively involved in HCS related work and issues: become HCS Approach registered organization since 2016, active in HCS Approach training and workshop since then, encourage its associates to be HCS Approach Practitioners. Aksenta has also been keeping itself at the edge by attending the RSPO Annual Roundtable Conference on Sustainable Palm Oil (RT) and other RSPO meetings since 2008. It also actively promotes sustainable palm oil and RSPO and its concern, mission and program to key stakeholders outside of "RSPO environment": Indonesian governmental institutions, local government, local communities, local NGOs and companies. It also promotes sustainable palm oil and RSPO to non-member palm oil companies to implement sustainable palm oil policy and management in its operations and to join RSPO.

As a Certification Body, we works as an independent body assessing the conformance of RSPO Certificate Holder to the implementation of RSPO Standard

1.7. How is your work on palm oil funded?

The funds is coming from the RSPO member certification process cost

Actions for Next Reporting Period**2.1. Outline actions that will be taken in the coming year to promote sustainable palm oil.**

Conducting RSPO certification process for RSPO members (Grower) to produce sustainable product

Challenges

1 What significant economic, social or environmental obstacles have you encountered in the production, procurement, use and/or promotion of CSPO and what efforts did you make to mitigate or resolve them?

Significant obstacles: 1. Lack of smallholders who know and understand the importance of management in producing sustainable palm oil. 2. The various interpretation of RSPO standard among Certification Body, Certificate Holder/member in certification process and Accreditation Body Effort that can be done: 1. Intensive coaching to smallholder by introducing the importance of management in producing sustainable palm oil such as through the promotion or understanding by organizing workshops or seminars specifically for smallholders. 2. A forum for the three stakeholder (Certification Body, Certificate Holder/RSPO member and RSPO Accreditation Body) to standardize the interpretation of RSPO Standard

2 In addition to the actions already reported in this ACOP how has your organization supported the vision of RSPO to transform markets in other ways? (e.g. Funding; Engagement with key stakeholders; Business to business education/outreach)

Our organization support the RSPO vision by carried out the workshop or seminar event to smallholders, institution and growers regarding sustainable product through RSPO

 5. Sustainability Report
 6. Others
-

Challenges

1 What significant economic, social or environmental obstacles have you encountered in the production, procurement, use and/or promotion of CSPO and what efforts did you make to mitigate or resolve them?

Many plantation companies have been facing with the social issues, relationship with community surrounding plantation and mill in some case problematic. This is a big concern. Social issues become constraint to get RSPO certificate. Companies are still lacking to invest more on the social management aspect to resolve social issues. For this issues we have cooperate with companies to develop social management that build better community-company relationship. Second, awareness and willingness to improve the Human Resources Capacity is also one of important element to sustainability. We organize training to help company improve its human resources skill and knowledge in sustainability.

2 In addition to the actions already reported in this ACOP how has your organization supported the vision of RSPO to transform markets in other ways? (e.g. Funding; Engagement with key stakeholders; Business to business education/outreach)

Engagement through providing consultancy services, public discussion and training and also B to B through konsultancy services, training, public share of information on sustainability by social media managed by Remark Asia social media.

If not, please explain why:

--

1.7. How is your work on palm oil funded?

We are funded by growers who want to use our RSPO Certification Services

Actions for Next Reporting Period**2.1. Outline actions that will be taken in the coming year to promote sustainable palm oil.**

We would like to promote sustainable palm oil by proposed to the client to be certified both ISPO and RSPO at the same time (combining audit) in order to make it simple and efficient

Challenges

1 What significant economic, social or environmental obstacles have you encountered in the production, procurement, use and/or promotion of CSPO and what efforts did you make to mitigate or resolve them?

The value added of CSPO is not significant as promise at the first launched so growers are not interested in RSPO Certification. We are trying to explain to the grower that by implementation of RSPO Certification will improve the image of business in Palm Oil Sector (Prevent the black campaign in Palm Oil Business)

2 In addition to the actions already reported in this ACOP how has your organization supported the vision of RSPO to transform markets in other ways? (e.g. Funding; Engagement with key stakeholders; Business to business education/outreach)

Actively participated as certification body in RSPO events.

1.5 Membership sector

Organisations

Affiliates

Operational Profile

1.1. What are the main activities of your organisation?

Nevedi (The Dutch Feed Industry Association) protects the interests of the Dutch feed industry. About 100 Feed companies and suppliers are associated with Nevedi. This represent more than 95% of the total feed production for livestock in the Netherlands. The members are producers of compound feed, milk replacers and premix additives as well as wet feed suppliers. The share of compound feed sold in the Netherlands by the members of Nevedi is more than 12 million metric tons. The annual turnover in the sector is 5,9 billion Euro with 5.500 employees being active. The main focus of Nevedi is on the subjects: good labour practices, food safety and feed quality and ustainability and innovation.

1.2. Does your organization use and/or sell any palm oil?

No

1.3. Activities undertaken to promote sustainable palm oil, the RSPO and/or members in the reporting period

amorg_undertaken_activities

1.4. What percentage of your organization's overall activities focus on palm oil?

10%

1.5. Did members of your staff participate in RSPO working groups/taskforces in the reporting period?

No

1.6. Do you have any collaborations with the industry players/private sector to support them in the market transformation towards CSPO?

Yes

If yes, please give details:

The members of Nevedi are feed producing industries. They are informed in member meetings and through the website about the possibilities to buy sustainable palm oil credits.

In a covenant with the Dutch Alliance of Sustainable Palm Oil (DASPO) Nevedi committed to cover the palm oil footprint for the Dutch consumption of animal products. They do this with RSPO Palm Trace credits.

Nevedi is part of an animal production chain. In that case we support the animal production sector for the use of sustainable palm oil indirectly through the feed.

If not, please explain why:

--

1.7. How is your work on palm oil funded?

The information provided on the website of Nevedi and during member meetings is funded by the Nevedi membership fees.

Actions for Next Reporting Period

2.1. Outline actions that will be taken in the coming year to promote sustainable palm oil.

In 2018 the members of Nevedi will again, as in 2017, individually fulfill the commitment made with DASPO to cover their palmoil footprint for the Dutch consumption of animal products.

Nevedi will monitor each quarter of the year the progress.

Nevedi will support the smaller members with forming a small collective to buy teamwise.

Challenges

1 What significant economic, social or environmental obstacles have you encountered in the production, procurement, use and/or promotion of CSPO and what efforts did you make to mitigate or resolve them?

Feed is an intermediate product in the animal production chain. There is nowhere in the entire chain a market demand for sustainable palm oil in feed. Nevedi took her own responsibility by becoming a member of RSPO and the Dutch Task Force for Responsible Soy (now DASPO). The first two years of the covenant Nevedi covered the palm oil footprint of her members collectively. As of 2017 the members of Nevedi are taking care of this themselves. Nevedi monitors the progress each quarter of the year in a survey.

2 In addition to the actions already reported in this ACOP how has your organization supported the vision of RSPO to transform markets in other ways? (e.g. Funding; Engagement with key stakeholders; Business to business education/outreach)

All is already mentioned in this ACOP.

1. Collaboration with FENAPALMAH as trainers in its training program for group managers.
2. Participation of UNpala's Group manager in Smallholders training by WWF and FHIA, speaking of the topic "Group Management Experience Sharing".
3. Simplified approach to HVC for Small producers training: was performed by group manager staff, on October 10th, with the participation of our partners from companies CORAPSA, ANAPIH and PALCASA.

If not, please explain why:

--

1.7. How is your work on palm oil funded?

Unpala's work in palm oil is funded by:

1. the contribution of members per tone of palm oil fruit sold.
2. Grupo Jaremar economic, human, logistics and advising contribution
3. Rspo-RSSF

Actions for Next Reporting Period

2.1. Outline actions that will be taken in the coming year to promote sustainable palm oil.

1. develop 2018 "Person to Person training program".
2. Calculate GHG for 2017
3. develop 2018 training program for group manager Staff
4. continue Soil and Foliar sampling and Analysis for Unpala's members
5. Strengthening of Internal Control System
6. develop Internal Audits Program
7. Continue Environmental Licensing Process
8. Develop Certification Audits for Group 1

Challenges

1 What significant economic, social or environmental obstacles have you encountered in the production, procurement, use and/or promotion of CSPO and what efforts did you make to mitigate or resolve them?

UNPALA has or is currently facing the following challenges: Economic Challenges: 1. Expensive Environmental licencing process and lack of support of local authorities. 2. lack of economic resources to strenghtening the staff structure and expenses required for the implementation process. 3. Lack of economic resources of smallholders under 50 hectares to invest in the improvements required by the Group Certification standar 4. Government lack of economic resources for monitoring and follow-up actions taken in order of RSPO certification. 5. The dispersed geographic location of the producers makes the implementation process more expensive and slow. Social Challenges: 1. Smallholders low educational level slow the awareness process and registry book usage. 2. Smallholders Decreasing interest and low engagement in RSPO certification. 3. Statal Authorities and institutions lack of knowledge of the palm oil cultivation best agriculture practices and the efforts that organisations like UNPALA deveolope to contribute to the welfare of the country 4. A strongly variable producers supply base due to strong competition between the companies in the palm oil sector. Enviromental Challenges: 1. government enviromental policies and regulations are difficult to fulfill for smalholders and organizations supporting them. 2.The geographical dispersion of independent producers in Honduras includes producers whose plantations are located in protected areas that were declared as such after the existence of palm cultivation in that area. Efforts: 1. Encourage the whole base of UNPALA´s members to attend to training progam and to enlist in the certification process. 2. Unpala´s is collaborating with state institutions to contribute the awareness of the certification process 3. Unpala has shared its experiencies with other independent producers, smallholders organizations, companies and other entities interested in supporting this type of initiatives in Honduras.

2 In addition to the actions already reported in this ACOP how has your organization supported the vision of RSPO to transform markets in other ways? (e.g. Funding; Engagement with key stakeholders; Business to business education/outreach)

1. Unpala is part of the Inter-institutional thecnical team, precided by el Instituto de Conservacion Forestal to update the management plans of the protected areas in Atlantic Littoral.

Particulars

About Your Organisation

1.1 Name of your organization

Yanmar Kota Kinabalu R&D Center Sdn. Bhd.

1.2 What are the main activity(ies) of your organisation?

- Oil Palm Growers
 - Palm Oil Processors and/or Traders
 - Consumer Goods Manufacturers
 - Retailers
 - Banks and Investors
 - Social or Development Organisations (Non Governmental Organisations)
 - Environmental or Nature Conservation Organisations (Non Governmental Organisations)
 - Affiliate Members
 - Supply Chain Associate
-

1.3 Membership number

8-0097-09-000-00

1.4 Membership category

Affiliate

1.5 Membership sector

Organisations

Affiliates

Operational Profile

1.1. What are the main activities of your organisation?

Biodiesel pilot plant development research

1.2. Does your organization use and/or sell any palm oil?

We use for small scale pilot plant biodiesel production research & engine performance test- RBDPO

1.3. Activities undertaken to promote sustainable palm oil, the RSPO and/or members in the reporting period

amorg_undertaken_activities

1.4. What percentage of your organization's overall activities focus on palm oil?

10%

1.5. Did members of your staff participate in RSPO working groups/taskforces in the reporting period?

No

1.6. Do you have any collaborations with the industry players/private sector to support them in the market transformation towards CSPO?

No

If yes, please give details:

--

If not, please explain why:

We use Palm product is small scale research only

1.7. How is your work on palm oil funded?

by our parent company

Actions for Next Reporting Period

2.1. Outline actions that will be taken in the coming year to promote sustainable palm oil.

Biodiesel pilot plant research

Challenges

1 What significant economic, social or environmental obstacles have you encountered in the production, procurement, use and/or promotion of CSPO and what efforts did you make to mitigate or resolve them?

palm oil price stability, transportation from palm oil plant to our company.

2 In addition to the actions already reported in this ACOP how has your organization supported the vision of RSPO to transform markets in other ways? (e.g. Funding; Engagement with key stakeholders; Business to business education/outreach)

business to business education
