3.6 How do you proactively promote RSPO and RSPO certified sustainable palm oil and oil palm products to your customers?

Currently, CI acepalma doesn't calculate how many miles tones of sustainable palm oil will be traded in the next year. However, we must take in count that in Colombia we are on the process with the growers and mills, and as a trader, Acepalma has to wait until they inform the progress on the production of sustainable palm oil. In the meantime, we have the following schedule_ Year percentage of RSPO in the total of PO traded: 2016 18% 2017 20% 2018 30% 2019 40% 2020 50% 2021 70% 2022 100%

Challenges

1 What significant economic, social or environmental obstacles have you encountered in the production, procurement, use and/or promotion of CSPO and what efforts did you make to mitigate or resolve them?

As trader, we have encountered with our suppliers that they have to invest money in changes they have to work into their plantations in order to comply with the RSPO standard. We think it has been the most important issue to have a slower process to get the certification.

2 How has your organization supported the vision of RSPO to transform markets? (e.g. Funding; Engagement with key stakeholders; Business to business education/outreach)

We are working on giving financing to plantations interested on getting the certification and then they will export the crude palm oil and the crude palm kernel with Acepalma.
