**Time-Bound Plan****2.1 Date of first supply chain certification (planned or achieved)**

2011

**2.3 What are your interim milestones towards achieving this RSPO certification commitment (year and progressive CSPO%)? Please state annual targets/strategies.**

Until our customers are willing to pay the premium for SG and ease of purchase we are unable to assure 100%. We are currently use 80% RSPO certified either MB or SG.

**2.4 Timebound plan - Year expected to only "handle/supply" RSPO certified oil palm products**

2020

**2.5 How do you promote RSPO and RSPO certified sustainable palm oil to your customers proactively?**

We actively promote the RSPO and the benefits of switching to CSPO when talking to the customers. Due to the premiums related to buying MB/SG oil blends in the UK we still have a demand for non-sustainable Not a lot has changed since the last ACOP despite our best efforts

**2.6 Which countries that your organization operates in do the above own-brand commitments cover?**

- United Kingdom

**GHG Emissions****3.1 Are you currently assessing the GHG emissions from your operations?**

No

**Please explain why**

Being a standard manufacturing site and not linked to any refinery in the UK we don't feel it would benefit our business and we have not been asked for any reports from our customers

**3.2 Do you publicly report the GHG emissions of your operations?**

No

**Please explain why**

No need for it at the moment

**Actions for Next Reporting Period****4.1 Outline actions that you will take in the coming year to promote CSPO use along the supply chain**

Being able to offer - Mass Balance, Segregated and non-sustainable allows us to have every offer available for our customers and the choice is then down to them. The growth of our business will come using MB or SG but we have been able to offer this for 6 years now.
