Comment:

Corbion uses relatively small amounts of palm oil for the production of its emulsifiers. While our usage of palm oil is small, we do recognize the importance of responsible sourcing of this ingredient and consider it a priority raw material in our responsible sourcing program.

Corbion joined RSPO in 2005 and currently all of our emulsifier plants are RSPO certified for Mass Balance (MB) production. We aim for 100% RSPO certification for all our supply chains by 2020. We only source palm oil and palm oil derivatives from suppliers that are member of RSPO and committed to work towards producing or buying certified sustainable palm oil. We are working with our suppliers to gradually convert our palm oil and palm oil derivatives which are not yet commercially available in North-America.

3.5 Which countries that your organization operates in do the above own-brand commitments cover?

United States

3.6 How do you proactively promote RSPO and RSPO certified sustainable palm oil and oil palm products to your customers?

We are working with customers who request RSPO-certified sustainable palm products to provide them with the option and we actively promote our RSPO-certified products, to stimulate the transition towards a responsible sourced supply chain for palm oil.

Trademark Use

4.1 Do you use or plan to use the RSPO trademark on your own brand products?

No

Please explain why:

We do not consider this relevant for B2B.

Actions for Next Reporting Period**5.1 Outline actions that you will take in the coming year to promote the use of RSPO certified sustainable palm oil and oil palm products along the supply chain**

Corbion aims to launch further MB based products depending on the market development. However, we are highly dependent on the availability of RSPO certified raw materials at our suppliers; currently not all of our palm-derived raw materials are available as RSPO certified in North-America.
