Time-Bound Plan**3.1 Year of first supply chain certification (planned or achieved)**

2009

Comment:

At DuPont, we work hard to integrate sustainability into our business. As a result, we were the first company to introduce sustainable emulsifiers based on the Mass Balance (MB) supply chain in 2009 (<http://www.foodnavigator.com/Market-Trends/Danisco-offers-sustainable-palm-based-emulsifiers>).

We were also the first company to introduce sustainable emulsifiers based on the Segregated supply chain (SG) in 2011. 100% of the palm oil that we source in Denmark are physically RSPO certified.

3.2 Year expected to/or started to handle/trade/process any RSPO-certified palm oil and oil palm products

2009

3.3 Year expected to achieve 100% RSPO certification of all palm product processing facilities*

2011

If target has not been met, please explain why:

The current certification covers all important supply chains in terms of volumes. There are a few production sites in small supply chains in which palm oil based emulsifiers are used, which have not been certified - but it would be highly challenging to cover them all.

3.4 Year expected to only handle/trade/process 100% RSPO-certified palm oil and oil palm products

2017

If target has not been met, please explain why:

As of 2017, all of our palm oil and derivatives are Certified as either Segregated, Mass Balance or Book & Claim. The commitments applies globally (an option that is not possible to choose in Q 3.5)

3.5 Which countries that your organization operates in do the above own-brand commitments cover?

Australia, Brazil, China, Denmark, Malaysia, Netherlands, United States

3.6 How do you proactively promote RSPO and RSPO certified sustainable palm oil and oil palm products to your customers?

We promote emulsifiers based on RSPO certified palm oil and derivatives through our homepage, campaigns, conference presentations, brochures, and interactions with customers and other stakeholders. We are members of the Danish National Initiative on Sustainable Palm oil (<https://foedevareer.di.dk/palmeolie/pages/palmeolie.aspx>) and recently joined the UN Sustainable Development Goal (SDG) initiative from Philanthropy to Business together with The Danish Industry Association (<http://www.dupont.com/industries/food-and-beverage/press-releases/global-leadership-role-in-sustainability.html>).

Trademark Use**4.1 Do you use or plan to use the RSPO trademark on your own brand products?**

Yes

Please state the markets where you use or intend to apply the Trademark and when you plan to start

We are considering it!

2020

Actions for Next Reporting Period**5.1 Outline actions that you will take in the coming year to promote the use of RSPO certified sustainable palm oil and oil palm products along the supply chain**

We will continue our efforts listed in 3.6 and further leverage RSPO based products through sustainability partnerships

Reasons for Non-Disclosure of Information**6.1 If you have not disclosed any of the above information please indicate the reasons why**

- None of the above

7.2 What best practice guidelines or information has your organization provided in the past year to facilitate the uptake of RSPO certified sustainable palm oil and oil palm products? What languages are these guidelines available in?**Comment:**

The link below is an example of a successful campaign we launched a few years back, but we have also made new presentation materials on RSPO emulsifiers that will be used in our business and the sales organization.

GHG Footprint

8.1 Are you currently reporting any GHG footprint?

Yes

Support for Smallholders

9.1 Are you currently supporting any independent smallholder groups?

No

Do you have any future plans to support independent smallholders?

No

Challenges

1 What significant economic, social or environmental obstacles have you encountered in the production, procurement, use and/or promotion of CSPO and what efforts did you make to mitigate or resolve them?

Clients in some regions are not willing to pay the premium for emulsifiers based on physically certified RSPO. Another challenge is the been lack of availability of MB/SG grades of palm oil derivatives.

2 In addition to the actions already reported in this ACOP how has your organization supported the vision of RSPO to transform markets in other ways? (e.g. Funding; Engagement with key stakeholders; Business to business education/outreach)

Sustainability is often a part of our customer dialogue and education is a part of this interaction.
