Challenges

1 What significant economic, social or environmental obstacles have you encountered in the production, procurement, use and/or promotion of CSPO and what efforts did you make to mitigate or resolve them?

In general we were not facing huge obstacles with CSPO. We would like to switch some of our products to SG Level but oil mills and manufacturers could not yet fulfill this requirement.

For products now available in SG Level such as palm kernel stearine the SG premium is substantially higher than on Palm oil. Therefore customers are more reluctant to Switch from MB to SG.

2 How would you qualify RSPO standards as compared to other parallel standards?

--

Cost Effective:

Yes

Robust:

Yes

Simpler to Comply to:

Yes

3 How has your organization supported the vision of RSPO to transform markets? (e.g. Funding; Engagement with key stakeholders; Business to business education/outreach)

Communication of our Guidelines to suppliers and certification of our own Company (SMETA 4 PILLARS) to validate our processes Business to Business education is widely spread as we were pioneering the establishment of RSPO principles at our Company in 2011. It is a mutual exchange of best practice approaches.
