## Challenges

### **1 What significant economic, social or environmental obstacles have you encountered in the production, procurement, use and/or promotion of CSPO and what efforts did you make to mitigate or resolve them?**

RSPO trademark is very known in the food sector but quite unknown in our market reference. RSPO meaning is not well understood by the final customer. So we have to work during the year promoting the RSPO sustainable supply chain models, explaining meanings and opportunity. We will have to study the right communication systema (leaflet, website etc..). This will be the main activities for next 3 years. Moreover, due to fact we manage directly the purchase of solid soap noodle, the supply chain is well defined. However in liquid comestic to obtain exact composition of surfactants by supplier and push for thei involvement in supply chain RSPO models is quite hard.

---

### **2 How has your organization supported the vision of RSPO to transform markets? (e.g. Funding; Engagement with key stakeholders; Business to business education/outreach)**

We will involve our customer explaining all Quality certification of pur product and pressing them on RSPO for solid soaps.
