5. How is your work on palm oil funded?

We use an ERP system for the management of all documente at level of the quality department and another ERP System (profab) for all other registration through the process of the company (from purchase to production). an unique set of product codes and product descriptions have been included in the data system for each incoming and out-going product. The code are also use in all the recipes and stock controls. These codes permit to trace all ingrediënts used for all productions. an extraction of these data's compared with the sales permits to calculate the amount of palm oil that are used and that have to be purchased in a mass balance supply chain model.

Actions for Next Reporting Period

6. Outline actions that will be taken in the coming year to promote sustainable palm oil.

Internal policy as well as increasing demand of customers for responsible and sustainable products is moving the company toward using 100% RSPO certified palm products.
In the future we would include the segregated supply chain model in our certification.
