Challenges

1 What significant economic, social or environmental obstacles have you encountered in the production, procurement, use and/or promotion of CSPO and what efforts did you make to mitigate or resolve them?

Market trends indicate that use of palm oil is unadvised, due to higher levels of glycidyl fatty acid esters. We are working on this with our palm oil suppliers.

2 In addition to the actions already reported in this ACOP how has your organization supported the vision of RSPO to transform markets in other ways? (e.g. Funding; Engagement with key stakeholders; Business to business education/outreach)

We consider this principle as a mandatory marketing trend. Something that we currently implement, not only with big retailers but also in B2B projects. We spread this principle not only in our institutional brochures but also in all the internal communication.
