| About your organisation | | | |
| Name of the organisation: | Lion Corporation | | |
| Membership number: | | | |
| What is the primary activity or product of your organisation? | Detergents (main brand name: Top) made from palm oil as a raw material | Other, please specify | |
| In addition to your activities as a consumer goods manufacturers, does your company have significant activities in any other parts of the palm oil supply chain? | | | |
| Organisation profile | <p>Founded in 1981, Lion Corporation has always been Japan's leading manufacturer of consumer goods, such as oral care, household, beauty care and pharmaceutical products. Lion's business also expands into the field of chemicals. Its business extends into major Asian countries (ASEAN and Northeast Asia). Lion employs about 6,000 people worldwide. Our net sales in 2004 were ¥310B. Lion has deep relations with palm oil. Lion developed MES (Methyl Ester Sulfonate), a surfactant made from palm oil, because it can be produced without fear of depleting natural resources, and because it can contribute to the prevention of global warming as biomass raw materials. MES is used in Lion's laundry detergents. Furthermore, Lion has recovered minor components from palm oil. Lion has been extracting carotene from palm oil on a commercial scale since 1991, and our carotene accounted for 70% of the world market for 'naturally derived carotene' in 2004.</p> | | |
| Please list any related company operating within the palm oil supply chain, which is linked through more than 51% ownership. E.g. an affiliate, a majority shareholder in a joint venture, a subsidiary or a parent company | Lion Chemical Co., Ltd | | Member of the RSPO |
