Marketing**10 Which supply chain options do you sell RSPO-certified palm oil products through?**

- Book & Claim
- Mass Balance

Time-Bound Plan**11 Date of first RSPO estate certification (planned or achieved)**

2010

12 Time-bound plan - Year expected to achieve 100% RSPO certification of estates

2018

13 What are your interim milestones towards achieving RSPO certification commitment (year and progressive CSPO%)

PT IIS has embarked into RSPO certification since 2009. We were able to certify 2 mills and 1 estate in 2010. We have RSPO time-bound plan in place to certify all of our mills and estates by 2018.

Timebound plan - Year expected to achieve 100% RSPO certification of associated smallholders and outgrowers)

2016

14 What are your interim milestones towards achieving this RSPO certification commitment (year and progressive CSPO%)

PT IIS is working together with smallholders in RSPO certification. We have RSPO time-bound plan in place to certify our smallholders by 2016. In 2011, the audit was conducted and a year later, in 2012, our smallholders received its first RSPO certificate and made Asian Agri as the largest RSPO certified smallholders in Indonesia.

15 Time-Bound plan - Year expected to achieve 100% RSPO certification of independently sourced FFB

2053

16 What are your interim milestones towards achieving this RSPO certification commitment (year and progressive CSPO%)

--

17 Which countries that your organization operates in do the above commitments cover?

Indonesia

Actions for Next Reporting Period**18 Outline actions that will be taken in the coming year to advance your plans for certification**

PT IIS is committed in the implementation sustainable practices within our operations, where smallholders as our partner also implement the same principles and criteria. 2010 has become the milestones for our company in implementing RSPO standards. PT IIS has RSPO time-bound plan in place to certify all of our mills and estates including those of smallholders. We continuously explore rooms of improvement and collaborating together with our key stakeholders.

Smallholders are our partner in producing sustainable oil which comprise around 30% of our production. Training and knowledge sharing between smallholders are key success to certify these smallholders. In 2012 we are working together with our stakeholders e.g. NGOs in funding and providing training of trainers in agricultural practices to support our smallholders certification. As a result, we are able to certify the largest volume of scheme smallholders in Indonesia.

Sustainability has become the main requirements and is able to transform the market. Emerging standards e.g. ISCC and ISPO are also being implemented in our operations, including our smallholders. We believe this will support in advancing our RSPO certification process.

19 Outline actions that will be taken in the coming year to promote sustainable palm oil

Engagement with key stakeholders is the key strategies to promote sustainable palm oil. We are actively participating in RSPO Working Group and discussion in developing robust but practical standards for both growers and smallholders.

Moreover, we also engage with NGOs in promoting RSPO certification of smallholders. This proves that with commitment and their hard work, smallholders can also implement RSPO standards.

20 Does your company have a public commitment relating to the GHG emissions of your operations?

Yes

Public commitment relating to the GHG emissions report:

--

21 Do you publicly report the GHG emissions of your operations? - Existing operations (as per Criterion 5.6)

--

Report the GHG emissions of operations - existing operations (as per Criterion 5.6)

--

21 Do you publicly report the GHG emissions of your operations? - Expected emissions associated with new plantings

--

Report the GHG emissions of operations - Expected emissions associated with new plantings (as per Criterion 7.8)

--

Reasons for Non-Disclosure of Information

22 If you have not disclosed any of the above information, please indicate the reasons why

Challenges

1. Significant economic, social or environmental obstacles

Presently, PT IIS has not encountered any significant economic, social or environmental obstacles in production, procurement, use and/or promotion of sustainable palm oil. However, we would like to note that in the procurement of sustainable palm oil, RSPO should also consider the economical and social practicability in the field, especially for smallholders (scheme or independent smallholders) in implementing standards endorsed by RSPO.

The certification of smallholders, for both scheme and independent smallholders, will increase the supply of RSPO certified oil. RSPO should ensure and promote the demand of RSPO certified oil in the market by encouraging off takers to procure 100% certified RSPO oil for their supply chain.

2. How would you qualify RSPO standards as compared to other parallel standards?

--

Cost Effective:

No

Robust:

Yes

Simpler to Comply to:

No

3. How has your organization supported the vision of RSPO to transform markets?

We are working together with government, environmental and NGOs in providing trainings and projects to support sustainability:

- RSPO Certification Smallholders Funding with international NGOs
 - Good agriculture practice training for independent smallholders through CSR / CSV programs and able to support them to become first RSPO certified independent smallholders in Indonesia.
 - Working with NGO to visit and promote our smallholder estate through media as part of motivation to other smallholders
-
