**Challenges**

**1 What significant economic, social or environmental obstacles have you encountered in the production, procurement, use and/or promotion of CSPO and what efforts did you make to mitigate or resolve them?**

The main problem is where palm derived materials are used in the make up of vitamin preps- and there is insufficient demand in the industry to make the changes - or the costs are commercially prohibitive and we have to resort to mass balance.

---

**2 How would you qualify RSPO standards as compared to other parallel standards?**

--

---

**Cost Effective:**

Yes

---

**Robust:**

Yes

---

**Simpler to Comply to:**

Yes

---

**3 How has your organization supported the vision of RSPO to transform markets? (e.g. Funding; Engagement with key stakeholders; Business to business education/outreach)**

We are still currently retailer driven- there does not appear to be any other commercial benefits gained by having demonstrated an understanding of the RSPO vision.

---

**4 Other information on palm oil (sustainability reports, policies, other public information)**

There still appears to be a number of other organisations within this cause, and not having one body makes the requirements and workload excessive especially for small to medium enterprises.
