## Actions for Next Reporting Period

### 7.1 Outline actions that you will take in the coming year to advance your plans for certification

1. Join the HCVRN
  2. Continue to comply to RSPO NPP process for all new plantings.
  3. Continue to work with international NGOs/consultancies to strengthen relevant SOPs and monitor implementation.
  4. Continue to build in-house capability to manage all operations in a sustainable manner in compliance with and in some aspects exceeding RSPO P&C requirements.
  5. Consider trial audit by reputable CB once first mill is commercially operational.
- 

### 7.2 Outline actions that you will take to promote CSPO along the supply chain

1. Develop and implement community oil palm programme which takes into consideration education and management of community/smallholder growers to comply to company's sustainability policies and where relevant SOPs in compliance with RSPO requirements.
  2. Education of contractors and suppliers to comply with RSPO P&C's where relevant.
- 

## Reasons for Non-Disclosure of Information

### 8.1 If you have not disclosed any of the above information, please indicate the reasons why

Other

---

#### - Others:

In Section 2.1 the term "land bank" denotes net land area hectareage for which the government of Liberia has granted to GVL such relevant rights as the government holds. Additionally, Liberian communities hold tribal, deeded, customary or other rights to lands. Such lands will only be included in GVL's net concession and planted lands upon legally binding FPIC-based agreements/MOUs reached between the right holding communities and GVL. For 2.1.3, the area set aside for conservation is with reference to estates already planted and not the total land bank. Similarly in Section 5, the submitted maps are for areas where agreements/MOUs already exist.

## Challenges

### 1 What significant economic, social or environmental obstacles have you encountered in the production, procurement, use and/or promotion of CSPO and what efforts did you make to mitigate or resolve them?

Limited and diverse understanding and opinion amongst stakeholders of oil palm cultivation, role of growers, RSPO role and procedures, communities structure and opinions, concession agreements, FPIC process, and local conditions. RSPO procedures in case of Liberia are slow and ineffective due to RSPO's lack of presence in Africa and communication challenges to Africa, and such as lack of approved African HCV assessors. Lack of definite and specific agreed FPIC guidelines cause significant uncertainty. - GVL has developed extensive set of information materials and conducts education and information efforts amongst communities, Government, NGO's and other stakeholders. GVL takes active role in RSPO dialogue

### 2 How would you qualify RSPO standards as compared to other parallel standards?

--

#### Cost Effective:

No

#### Robust:

Yes

#### Simpler to Comply to:

similar

### 3 How has your organization supported the vision of RSPO to transform markets? (e.g. Funding; Engagement with key stakeholders; Business to business education/outreach)

1. Full support of RSPO P&Cs and process in the belief that this is currently the best chance to make the palm oil industry a responsible and sustainable one.
2. Help to create awareness among Liberian NGOs, government and community on the role and function of RSPO.
