Challenges

1 What significant economic, social or environmental obstacles have you encountered in the production, procurement, use and/or promotion of CSPO and what efforts did you make to mitigate or resolve them?

The biggest obstacle for us was economic, in the sense that the cost of moving to all sustainable palm oil costs us more to produce our products. Our customers have been increasingly asking for this change, so we have decided to make the switch as it is the right thing to do although we may not be able to recoup the cost difference.

2 In addition to the actions already reported in this ACOP how has your organization supported the vision of RSPO to transform markets in other ways? (e.g. Funding; Engagement with key stakeholders; Business to business education/outreach)

This has been a developmental year for us, with just becoming certified. We are really trying to educate ourselves first before we can take this out in other ways.
