Challenges

1 What significant economic, social or environmental obstacles have you encountered in the production, procurement, use and/or promotion of CSPO and what efforts did you make to mitigate or resolve them?

• Challenge: Farmers have difficulty accessing fertilizers. The uneven distribution of fertilizer among farmers causes the low productivity of oil palm crops. Solution: Currently KUD Tani Subur plays a role as fertilizer supplier for farmers. The payment system is on terms. • Challenge: Farmers have limited access to health insurance. Gaining access to health insurance with monthly installment payments is not an easy thing for farmers, considering the amount of fees that must be paid to cover family members, as well as other routine expenses such as electricity, water, and kitchen needs. Solution: Organizing knowledge sharing sessions/socialization to increase farmer's understanding about the importance of health insurance. • Challenge: Land release for HCV areas. Farmers have to give up 5 meters of land through which the river passes, as a buffer zone that must be kept free from hazardous chemicals. For farmers with an average land of 1 hectare, 5 meters is a huge sacrifice

2 How has your organization supported the vision of RSPO to transform markets? (e.g. Funding; Engagement with key stakeholders; Business to business education/outreach)
