3.5 Which countries that your organization operates in do the above own-brand commitments cover?

France

3.6 How do you proactively promote RSPO and RSPO certified sustainable palm oil and oil palm products to your customers?

We buy 100 pct of our crude palm oil from a single supplier who has implemented since december 2013 a Policy of "no deforestation, no peat, no exploitation".

100 pct of each shipment is traced back to each mill in producing countries which have processed the FFB, with their GPS longitude & latitude position, for building up each sea shipment.

All these mills have committed to implement & to respect this "NDPE" Policy, failing which they are banned.

We are entitled by our supplier to forward this traceability to our customers who are the french compound feed manufacturers.

Trademark Use

4.1 Do you use or plan to use the RSPO trademark on your own brand products?

No

If target has not been met, please explain why:

see comments above in 3.6, we promote the 'NDPE' Policy of our supplier.

Actions for Next Reporting Period**5.1 Outline actions that you will take in the coming year to promote the use of RSPO certified sustainable palm oil and oil palm products along the supply chain****Reasons for Non-Disclosure of Information****6.1 If you have not disclosed any of the above information please indicate the reasons why****Application of Principles & Criteria for all members sectors****7.1 Do you have organizational policies that are in line with the RSPO P&C, such as:**

- Water, land, energy and carbon footprints
- Land Use Rights
- Ethical conduct and human rights
- Labour rights
- Stakeholder engagement
- None of the above

7.2 What best practice guidelines or information has your organization provided in the past year to facilitate the uptake of RSPO certified sustainable palm oil and oil palm products? What languages are these guidelines available in?**Comment:**

--

7.3. Your answers above indicate that you are not yet using 100% RSPO certified palm oil and oil palm products. Do you have plans to immediately cover the gap using Book & Claim?

No

Please explain why:

Our customers (feed compounders) cannot afford to pay the RSPO premium (B&C, MB or CSPO) because their own customers do not want to pay for it, and the margins in the sector of activity are very thin. That is the reason why we need to promote CSPO towards final customers, in order to create the demand. France is not the easiest location to do it, because palm oil image is very bad, both on the health & on the environment issues. Therefore, there is a lot of work to do before achieving this result.

GHG Footprint**8.1 Are you currently reporting any GHG footprint?**

No

Please state if you have any future plans to do so?

--

Support for Smallholders

9.1 Are you currently supporting any independent smallholder groups?

No

Do you have any future plans to support independent smallholders?

No

Challenges

1 What significant economic, social or environmental obstacles have you encountered in the production, procurement, use and/or promotion of CSPO and what efforts did you make to mitigate or resolve them?

Cost premium prevent our customers from buying RSPO material. Our main effort this year has been to promote the 100 pct traceability up to the mills implementing the 'NDPE' Policy of our supplier, in order to guarantee to our customers a first class level of service & safety for their Crude Palm Oil purchases.

2 In addition to the actions already reported in this ACOP how has your organization supported the vision of RSPO to transform markets in other ways? (e.g. Funding; Engagement with key stakeholders; Business to business education/outreach)
