Challenges

1 What significant economic, social or environmental obstacles have you encountered in the production, procurement, use and/or promotion of CSPO and what efforts did you make to mitigate or resolve them?

1. Many Japanese suppliers have not yet been certified for RSPO, so we cannot source certified derivatives easily. 2. Certified suppliers charge a premium for certified goods. 3. The requirements for Mass Balance told to us by the RSPO organization do not match the requirements advised by the certification body.

2 In addition to the actions already reported in this ACOP how has your organization supported the vision of RSPO to transform markets in other ways? (e.g. Funding; Engagement with key stakeholders; Business to business education/outreach)

At this stage, all of our actions have been internal, or with our suppliers. After achieving certification, we will consider ways to utilize the information for encouraging improvements.
