Challenges

1 What significant economic, social or environmental obstacles have you encountered in the production, procurement, use and/or promotion of CSPO and what efforts did you make to mitigate or resolve them?

For intermediate raw material manufacturers like us, the increase in the quantity of CSPOs depends on the customer's requirements. Still now, many customers have low understanding of RSPO and it is difficult to convince our customers to accept premium price. In cooperation with some highly motivated customers, NOF is proceeding to supply RSPO products in response to their demand.

2 In addition to the actions already reported in this ACOP how has your organization supported the vision of RSPO to transform markets in other ways? (e.g. Funding; Engagement with key stakeholders; Business to business education/outreach)

We cosponsored and participated in "Japan Sustainable Palm Oil Conference (Nov. 6, 2017)." This conference was held with the aim of deepening the understanding of RSPO and promoting activities by exchanging information with various stakeholders on the current situation regarding sustainable development.
