Challenges

1 What significant economic, social or environmental obstacles have you encountered in the production, procurement, use and/or promotion of CSPO and what efforts did you make to mitigate or resolve them?

The biggest difficulty is the fact that our clients do want RSPO-certified products, but do not wish to pay more for them. As the audit costs and surplus for buying the products is rather high, we lose money on these products. For the products that have changed to RSPO: our clients do not sell more of them. Therefore we have the impression that the end-consumer really doesn't care.

2 How would you qualify RSPO standards as compared to other parallel standards?
