• using palm oil produced without causing any deforestation or exploitation, i.e., palm oil from plantations that adopt ecologically sound policies with regard to high conservation value forests, carbon-rich forests and peatlands, which also support the development of small producers and respect local communities and workers' rights;

• sharing progress reports and information regarding actions and next steps to be taken.

7.2 What best practice guidelines or information has your organisation provided in the past year to facilitate the uptake of RSPO-certified sustainable palm oil and oil palm products? What languages are these guidelines available in?

The Group believes that close collaboration among stakeholders across the production chain, NGOs, refiners, growers and manufacturers, is the only way to achieve the common goal of using only palm oil produced without causing deforestation or exploitation.

Since 2015, the Group undertook several initiatives to get private-label suppliers involved in this process, sending them letters describing its palm oil policy and organising awareness-raising working seminars in Brazil. It also published the "Casino Group Palm Oil Procurement" guide to promote the policy among employees, and held several working meetings to engage the teams concerned in the various banners.

Actions should be led with raffiners who are the point of entry in the European and French markets of the palm oil used downstream by the manufacturers of our own brand products. For this we asked our suppliers to obtain better visibility of our palm oil supply chain.

10.2 In addition to the actions already reported in this ACOP, how has your organisation supported the vision of RSPO to transform the market for sustainable palm oil in other ways? (e.g. Funding; Engagement with key stakeholders; Business to business education/outreach)

Given that the Group does not deal directly with refiners, in January 2019, it joined the Palm Oil Transparency Coalition (POTC) to take collective action in association with other retailers who share the same commitment and, in many cases, the same refiners. Joint initiatives also have a more effective impact on tier-two suppliers. On behalf of the POTC members, assessment questionnaires have been sent to the initial palm oil importers to get a precise picture of their commitment to sustainable palm oil. The findings will then be shared with all of the coalition members so that they can align their future purchases accordingly.

In Brazil and Colombia, the vast majority of palm oil used in private-label products is sourced locally, where the risk of deforestation is lower than in Indonesia and Malaysia, which supply the palm oil used in France. In Colombia, Grupo ?axito is supporting TFA 2020, a multi-stakeholder initiative launched in 2012 after the Rio+20 Summit, whose objective is to reduce tropical deforestation related to palm oil, soy and beef (www.tfa2020.org). ?axito also signed the TFA, ?s Palm Oil National Agreement, which supports joint stakeholder efforts to eliminate deforestation in the palm oil supply chain.

10.3 Please attach or add links to any other information from your organisation on your palm oil policies and activities (e.g.: sustainability reports, policies, other public information)
