Challenges

1 What significant economic, social or environmental obstacles have you encountered in the production, procurement, use and/or promotion of CSPO and what efforts did you make to mitigate or resolve them?

1) HCV assessors training course with Proforest ; the schedule is full 6 months in advance and it does not exist here in Madagascar, so to conduct a HCV assessment for the new smallholder's plantation is very difficult. We will have training for a lead auditor 2) The surveillance audit cost the same as a main audit: cost effective is not affordable for a small company like us: RSPO have to consider smallholder economic viability for individual certification 3) French language should be encouraged to incorporate more smallholders here in Africa (Ivory coast, Cameroun, Bénin, Guinée, Burkina Faso.....) . 4) We need to interact between certified grower /mill: internet forum

2 How would you qualify RSPO standards as compared to other parallel standards?

--

Cost Effective:

No

Robust:

Yes

Simpler to Comply to:

Yes

3 How has your organization supported the vision of RSPO to transform markets? (e.g. Funding; Engagement with key stakeholders; Business to business education/outreach)

We only sell our product to certified RSPO companies. We want to promote exclusively Identity Preserved CSPO labeling. We have an agreement with a private school Maison Familiale Rurale inside our plantation (<http://www.mfr.asso.fr/pages/accueil.aspx>) to make a RSPO /organic training book for school

4 Other information on palm oil (sustainability reports, policies, other public information)

1) We are already looking forward for RSPO NEXT (only if the market will demand). Our policy already include: No Deforestation, No Fire, No Planting on Peat, Respect for Human Rights and Transparency 2) We are looking for ISO 14 0001 certification to improve our environment monitoring
