Actions for Next Reporting Period

5.1 Outline actions that you will take in the coming year to promote the use of RSPO certified sustainable palm oil and oil palm products along the supply chain

We have contacted all of our suppliers working with palm oil and as a result have switched many of our supply of major palm oil containing ingredients to RSPO certified mass balance or segregated supply. We will continue to encourage and promote our non RSPO supplier to become certified. The difficulty not is for the suppliers of the smaller percentages of palm oil (less than 2%) - as percentages are such a small volume, it is not deemed necessary for the supplier to become RSPO certified as it is 'not applicable'

For future development work we will aim to only source suppliers with RSPO certified mass balance or segregated where possible.

Challenges

1 What significant economic, social or environmental obstacles have you encountered in the production, procurement, use and/or promotion of CSPO and what efforts did you make to mitigate or resolve them?

We have a number of suppliers that have no plans on becoming RSPO certified as our volumes that we take from them are not large enough for them to have the implicated cost of becoming certified. Also some of our raw materials contain a small % of palm oil fractions/derivatives which are not available to be sourced as segregated or mass balanced. This is because supplier are reluctant to source the palm oil of which is less than 2% as it is not deemed necessary according to their RSPO certification system. It is 'not applicable'.

2 In addition to the actions already reported in this ACOP how has your organization supported the vision of RSPO to transform markets in other ways? (e.g. Funding; Engagement with key stakeholders; Business to business education/outreach)

We have supported the use of RSPO methods in line with meeting retailers expectations and from this we aim to source all of our raw materials (when possible) from RSPO certified suppliers. Our RSPO certification is communicated throughout the company and to customers when requested.

Do you have any future plans to support independent smallholders?

No

Challenges

1 What significant economic, social or environmental obstacles have you encountered in the production, procurement, use and/or promotion of CSPO and what efforts did you make to mitigate or resolve them?

Not all of the raw materials that contain palm oil derivatives were available as RSPO-certified materials and therefore we had to look for alternatives of palm oil in some of the raw materials we use.

2 In addition to the actions already reported in this ACOP how has your organization supported the vision of RSPO to transform markets in other ways? (e.g. Funding; Engagement with key stakeholders; Business to business education/outreach)

Engagement with key stakeholders

We had no obstacles.

2 In addition to the actions already reported in this ACOP how has your organization supported the vision of RSPO to transform markets in other ways? (e.g. Funding; Engagement with key stakeholders; Business to business education/outreach)

We promote the RSPO Label on our Website. But because we are a producer for private label, we don't have an own brand. So we are not able to promote RSPO on the label of the packaging by ourselves. We always sensitize our clients and advertise, that we are certified and are able to produce RSPO certified products to erase raise the disposal of RSPO articles.

5.1 Outline actions that you will take in the coming year to promote the use of RSPO certified sustainable palm oil and oil palm products along the supply chain

Main retailers we work with ask for RSPO certified palm oil / derivatives. For this reason, we design all the new products with RSPO certified ingredients and at the same time we gradually update the existing recipes with sustainable palm oil / palm oil derivatives. Furthermore, starting from this year we will take notes of the volumes of palm oil / palm oil derivatives traded as recipes in our products as requested by the present ACOP.

Challenges

1 What significant economic, social or environmental obstacles have you encountered in the production, procurement, use and/or promotion of CSPO and what efforts did you make to mitigate or resolve them?

In the Italian market, RSPO is not considered a guarantee of the sustainability of the palm oil. Palm oil and palm oil based ingredients are considered unsustainable as matter of fact. For this reason, the majority of our National retailers prefer we to take off any oil palm related ingredients from our recipes.

2 In addition to the actions already reported in this ACOP how has your organization supported the vision of RSPO to transform markets in other ways? (e.g. Funding; Engagement with key stakeholders; Business to business education/outreach)

We trace only the RSPO certified ingredients for those retailers in UK that ask for it. Of course, introducing this requirement in our sourcing model promotes in turn the use of the sustainable oil along the supply chain. And this is the purpose of our UK clients.

Challenges

1 What significant economic, social or environmental obstacles have you encountered in the production, procurement, use and/or promotion of CSPO and what efforts did you make to mitigate or resolve them?

The high cost with the certification process. The non-recognition of benefits by consumers that makes them accept the price difference.

2 In addition to the actions already reported in this ACOP how has your organization supported the vision of RSPO to transform markets in other ways? (e.g. Funding; Engagement with key stakeholders; Business to business education/outreach)

The effort for dissemination and promotion is high for small industries like ours. It is difficult to allocate human and financial resources that can be return to the market. There must be an "easy" model adjusted to this reality, where leadership is taken by larger companies.

Challenges

1 What significant economic, social or environmental obstacles have you encountered in the production, procurement, use and/or promotion of CSPO and what efforts did you make to mitigate or resolve them?

There are a huge amount of misinformation and misunderstanding about palm oil and palm oil production in Finland. We have been correcting the misinformation on product presentations at one on one conversations with customers. We have contacted the media whenever we have noticed wrong information presented by them. We have contacted the nutritional opinion leaders and explained in detail about the benefits of RSPO palm oil and palm oil production.

2 In addition to the actions already reported in this ACOP how has your organization supported the vision of RSPO to transform markets in other ways? (e.g. Funding; Engagement with key stakeholders; Business to business education/outreach)

Spreading the information thru our company web page (bonred.fi) and also we have collected pro palm oil information into redpalmoil.com web page what we own. Spreading the information thru Facebook and other social media.

No

Do you have any future plans to support independent smallholders?

No

Challenges

1 What significant economic, social or environmental obstacles have you encountered in the production, procurement, use and/or promotion of CSPO and what efforts did you make to mitigate or resolve them?

We did not encounter obstacles, because we are dependend of our customer. The privat label owner is dependend on his customer requirements. We, as a private label manufacturer, produce products as the private label owner requests.

2 In addition to the actions already reported in this ACOP how has your organization supported the vision of RSPO to transform markets in other ways? (e.g. Funding; Engagement with key stakeholders; Business to business education/outreach)

We are a production facility for private label products (with RSPO trademark). The owner of the private labels supports the use of RSPO Palm oil, in this way that he makes his costumers familiar with this trademark. We are planning to get RSPO-segregated certified in 2018 for our customer requires this level.

Challenges

1 What significant economic, social or environmental obstacles have you encountered in the production, procurement, use and/or promotion of CSPO and what efforts did you make to mitigate or resolve them?

It is more expensive to maintain RSPO certification. Need more resources to keep up to date. Time consuming and ensuring all our ingredients are RSPO certified and obtain the information from suppliers.

2 In addition to the actions already reported in this ACOP how has your organization supported the vision of RSPO to transform markets in other ways? (e.g. Funding; Engagement with key stakeholders; Business to business education/outreach)

We have shared our commitment to using RSPO certified products with our suppliers and are encouraging non- certified suppliers to become certified.

Trademark Related

4.1 Do you use or plan to use the RSPO Trademark on your own brand of products?

Yes

Please state which product range(s) and market(s) you intend to apply the Trademark and when you plan to start using the Trademark.

Dewey's Bakery was certified with RSPO in 2015. We source our palm from Columbus Vegetable Oils (also certified with RSPO). We use this palm in various cookie and cracker products both private label and Dewey's branded products.

Year: 2015

Actions for Next Reporting Period

5.1 Outline actions that you will take in the coming year to promote the use of RSPO certified sustainable palm oil and oil palm products along the supply chain

In following the rules and regulations set forth by RSPO and the certification process, we strive to not only promote RSPO certified products however, we also educate our customers and consumers. We receive requests and questions from both groups and we are forthcoming with our RSPO certification plan.

No

Do you have any future plans to support independent smallholders?

No

Challenges

1 What significant economic, social or environmental obstacles have you encountered in the production, procurement, use and/or promotion of CSPO and what efforts did you make to mitigate or resolve them?

Cost of ingredient certified to MB or SG often prohibitive. Availability of MB or SG ingredients has been limited. Where possible we have sought alternative feedstock derived ingredients eg Coconut, Rapeseed, Corn

2 In addition to the actions already reported in this ACOP how has your organization supported the vision of RSPO to transform markets in other ways? (e.g. Funding; Engagement with key stakeholders; Business to business education/outreach)

Challenges

1 What significant economic, social or environmental obstacles have you encountered in the production, procurement, use and/or promotion of CSPO and what efforts did you make to mitigate or resolve them?

Fantasy Cookie uses a smaller percentage of palm oil fraction compared to our usage of straight process CPO OR CPKO. The customer interest for CSPO in other (non European) regions of the world is still limited and the additional cost for CSPO seems in many cases an important driver for customers not to make the change yet to a physical CSPO supply chain model. As the production of certified CSPO continues to grow over the next couple of years in the countries of origin and ultimately CSPO becomes the norm, it will become easier both from an (global) availability & cost perspective, for customers to start using products based on accredited certified sustainable palm oil fractions or derivatives.

2 In addition to the actions already reported in this ACOP how has your organization supported the vision of RSPO to transform markets in other ways? (e.g. Funding; Engagement with key stakeholders; Business to business education/outreach)

The RSPO Principles are part of our palm oil policy and are fully endorsed by Fantasy Cookie. In 2017 we have had multiple engagement with our direct vendor base who represent 96% of our global volumes of palm oil. We expect our suppliers to strictly adhere to our policy and have a policy which complaint to ours.

Challenges

1 What significant economic, social or environmental obstacles have you encountered in the production, procurement, use and/or promotion of CSPO and what efforts did you make to mitigate or resolve them?

The main obstacle encountered in the last years in the use of the Palm Oil, all over the Europe, is the strong attack of the media and the Green Organisations that "killed" the Palm Oil use in the GDO's food products. Unfortunately RSPO answered to late and without "strong" answers or guarantees to this press campaigns.

No

Do you have any future plans to support independent smallholders?

No

Challenges

1 What significant economic, social or environmental obstacles have you encountered in the production, procurement, use and/or promotion of CSPO and what efforts did you make to mitigate or resolve them?

The main obstacle we have faced to date pertaining to the procurement of CSPO is ensuring that we only source from RSPO certified organisations and ensuring relevant documentation and compliance is adhered to. Ways we have mitigated this is ensuring that upon confirming preferred suppliers we have altered our supplier agreement to reflect the mandatory documentation of RSPO Membership Registration Numbers to validate a companies' CSPO.

2 In addition to the actions already reported in this ACOP how has your organization supported the vision of RSPO to transform markets in other ways? (e.g. Funding; Engagement with key stakeholders; Business to business education/outreach)

To support the vision of RSPO to transform markets we only source products/ingredients from RSPO certified companies and businesses. FMI Australia feel strongly toward supporting the RSPO philosophy and system and only endeavor to engage in business relationships with companies who share the same interests and passion toward the RSPO cause. We have developed an RSPO awareness training guide and assessment tool to assess employees within FMI on their RSPO knowledge. We will endeavor to build on this moving forward.

Actions for Next Reporting Period

5.1 Outline actions that you will take in the coming year to promote the use of RSPO certified sustainable palm oil and oil palm products along the supply chain

Gattefossé works intensively with the companies from which we buy, to engage more closely with the sustainable palm supply chain. We also engage our customers by encouraging them to switch to the use of certified RSPO ingredients. The RSPO certification process is a transparent and effective system to promote the growth of the sustainable palm production, in a transparent manner. In the coming months, we will put on the market more certified MB ingredients; We also intend to achieve RSPO certification for our Asian production site.

Challenges

1 What significant economic, social or environmental obstacles have you encountered in the production, procurement, use and/or promotion of CSPO and what efforts did you make to mitigate or resolve them?

We have adhered to the rules of the RSPO for the year since our first audit and have been audited successfully in 2017 so that we can remain a member and supply to our member customers.

2 In addition to the actions already reported in this ACOP how has your organization supported the vision of RSPO to transform markets in other ways? (e.g. Funding; Engagement with key stakeholders; Business to business education/outreach)

We have shared our commitment to using RSPO certified products with our suppliers and that we have also included our membership of the RSPO in our Environment Policy within our Quality Management System. We have also put our RSPO certificate in our reception to be viewed by all staff and visitors.

Actions for Next Reporting Period**5.1 Outline actions that you will take in the coming year to promote the use of RSPO certified sustainable palm oil and oil palm products along the supply chain**

We promote the use through educational copy on our retail packaging and on our website. We also educate our independent sales reps and wholesale buyers about RSPO and the sustainable movement. We are now in early talks with contacts at Sime Darby and Musim Mas about sourcing certified sustainable materials from one of them instead of using the book and claim system as we have always done. Due to our low volumes/demand, suppliers have been reluctant to work with our small company.

GHG Footprint

8.1 Are you currently reporting any GHG footprint?

No

Please state if you have any future plans to do so?

Please contact me with more information on this. We do work with Carbonfund.org to calculate all of our office and transportation emissions and contribute to their reforestation projects each year to offset said emissions.

Support Smallholders

9.1 Are you currently supporting any independent smallholder groups?

No

Do you have any future plans to support independent smallholders?

No

Challenges

1 What significant economic, social or environmental obstacles have you encountered in the production, procurement, use and/or promotion of CSPO and what efforts did you make to mitigate or resolve them?

As mentioned above, we are a small company that has slowly grown over the past 8 years. Due to the low volume of our demand, suppliers have not been willing to help us source IP or segregated materials, so we have relied on the book and claim system since we launched 8 years ago to cover our needs.

2 In addition to the actions already reported in this ACOP how has your organization supported the vision of RSPO to transform markets in other ways? (e.g. Funding; Engagement with key stakeholders; Business to business education/outreach)

Also as mentioned above, we have used our company as a platform to educate U.S. consumers about the sustainable movement in the palm oil industry. We do this through educational copy on our retail packaging and on our website, and by training our independent sales teams and wholesale buyers. We also give 1% of our annual gross revenues to the Orangutan Land Trust to support the work they do in this area.

4.1 Do you use or plan to use the RSPO trademark on your own brand products?

No

If target has not been met, please explain why:

Currently our own brands are sold to customers that are not overly interested in Branding. They mainly want to know that our raw material is certified but do not necessarily want to buy certified material.

As a trader this is not very important to us

Actions for Next Reporting Period**5.1 Outline actions that you will take in the coming year to promote the use of RSPO certified sustainable palm oil and oil palm products along the supply chain**

We will be on the pulse of our customers and listen to their needs. The certified sustainable palm production will be discussed everytime when we discuss palm products.

No

Challenges

1 What significant economic, social or environmental obstacles have you encountered in the production, procurement, use and/or promotion of CSPO and what efforts did you make to mitigate or resolve them?

The most important is the bad publicity of the palm oil, so we have decided not to include the RSPO logo in our products.

2 In addition to the actions already reported in this ACOP how has your organization supported the vision of RSPO to transform markets in other ways? (e.g. Funding; Engagement with key stakeholders; Business to business education/outreach)

Nowadays the quantity of palm oil used in our products is minimum, so we are not doing many things in this area.

We are planning to convert all of our palm oil used in our candy manufacturing to RSPO certified palm oil in 2018. With this change, we will be looking to put the RSPO trademark on applicable packaging. This will also require that all of the palm oil that we source throughout the supply chain is RSPO certified.

Challenges

1 What significant economic, social or environmental obstacles have you encountered in the production, procurement, use and/or promotion of CSPO and what efforts did you make to mitigate or resolve them?

The biggest obstacle for us was economic, in the sense that the cost of moving to all sustainable palm oil costs us more to produce our products. Our customers have been increasingly asking for this change, so we have decided to make the switch as it is the right thing to do although we may not be able to recoup the cost difference.

2 In addition to the actions already reported in this ACOP how has your organization supported the vision of RSPO to transform markets in other ways? (e.g. Funding; Engagement with key stakeholders; Business to business education/outreach)

This has been a developmental year for us, with just becoming certified. We are really trying to educate ourselves first before we can take this out in other ways.

GHG Footprint

8.1 Are you currently reporting any GHG footprint?

No

Please explain why

In order to reduce the environmental footprint of the building as much as possible, Kim's Chocolates has introduced several measures to make it arguably the "greenest" chocolate factory in Europe. The company has invested approximately €4 million in environmentally friendly techniques:

- All building materials are 100% recyclable.
- Our 2.987 solar panels provide between 15 and 20% of our the energy needs (\pm 600.000kWh/yr).
- All other electricity comes from 100% renewable sources: hydro, solar and wind energy.
- A white roof slows down the warming-up of the building.
- The building uses the latest technology for air-conditioning and ventilation.
- The facility has a chiller, based on ammonia, to convert thermal energy.
- An up-to-date lighting system has automatic controls wherever possible.
- A water treatment installation, based on bio-fermentation, is a new technique for smaller food industries, developed with support from the Flemish government. \pm 90% of the nutrients are removed from waste water and end up as fertiliser for agriculture.

Support for Smallholders**9.1 Are you currently supporting any independent smallholder groups?**

Yes

Cocoa producers in Tanzania
<https://www.cocoaforschools.be/>

The "Cocoa for Schools" project is committed to improve the lives of thousands of cocoa farmers and their families in the Kyela, Busokelo and Rungwe districts of Mbeya, Tanzania. Investing in education is a huge part of this programme, as it has been shown to be the single most effective way of getting out of poverty.

Through the "Cocoa for Schools" project, Kim's Chocolates works tirelessly to improve the infrastructure for education in the local communities. Our target is to build, complete or renovate in the next 10-12 years around 1900 classrooms and teacher's offices and to distribute around 430.000 school books. Beyond education, the project also assists farmers in a number of ways, including teaching agricultural skills, distributing new cocoa seedlings and providing solar electricity generating devices.

Challenges

1 What significant economic, social or environmental obstacles have you encountered in the production, procurement, use and/or promotion of CSPO and what efforts did you make to mitigate or resolve them?

None

2 In addition to the actions already reported in this ACOP how has your organization supported the vision of RSPO to transform markets in other ways? (e.g. Funding; Engagement with key stakeholders; Business to business education/outreach)

Difficult since we do not buy directly from the producers of palm but via our supplier which are in direct contact with the farmers

GHG Footprint

8.1 Are you currently reporting any GHG footprint?

No

Please explain why

We have no legislative or customer obligation to do so.

Support for Smallholders

9.1 Are you currently supporting any independent smallholder groups?

No

Do you have any future plans to support independent smallholders?

No

Challenges

1 What significant economic, social or environmental obstacles have you encountered in the production, procurement, use and/or promotion of CSPO and what efforts did you make to mitigate or resolve them?

We have met some doubts from customers regarding recent public health alarms due to content of 3-MCPA , Glycidyl esters etc from palm oil in food products(biscuits, infant formulas etc). We only hope that this is one in a long list of food hazards alarms popping up all the time.

2 In addition to the actions already reported in this ACOP how has your organization supported the vision of RSPO to transform markets in other ways? (e.g. Funding; Engagement with key stakeholders; Business to business education/outreach)

No. We are only a very small organization with focus on manufacturing products that meet our customers demands

Challenges

1 What significant economic, social or environmental obstacles have you encountered in the production, procurement, use and/or promotion of CSPO and what efforts did you make to mitigate or resolve them?

In Japan, I think that the degree of interest of RSPO (CSPO) is still low. It is expected that the necessity will increase in the future.

2 In addition to the actions already reported in this ACOP how has your organization supported the vision of RSPO to transform markets in other ways? (e.g. Funding; Engagement with key stakeholders; Business to business education/outreach)

We are preparing RSPO certificates with our suppliers so that we can respond quickly to customer requests.

Trademark Related

4.1 Do you use or plan to use the RSPO Trademark on your own brand of products?

No

Please explain why

In 2017 we didn't use the RSPO Trademark on our own brand of products.
We are considering entering the RSPO Trademark on our website following the RSPO communications rules..

Actions for Next Reporting Period

5.1 Outline actions that you will take in the coming year to promote the use of RSPO certified sustainable palm oil and oil palm products along the supply chain

We are considering entering the RSPO Trademark on our website to inform our customers that our chocolate pralines are produced with RSPO certified sustainable palm oil.
Our sales manager informs our customers that we are member of the RSPO supply chain and what this imply.

From June 2017 we use in our pralines filling just RSPO certified sustainable palm oil and palm oil products and we will continue in 2018.

Challenges

1 What significant economic, social or environmental obstacles have you encountered in the production, procurement, use and/or promotion of CSPO and what efforts did you make to mitigate or resolve them?

In Europe (especially Germany and Austria) certified Palm Oil is not seen positively enough. Palm oil is not seen as a source for sustainability. The understanding for RSPO is not good enough by the consumers, because of negative media coverage.

2 In addition to the actions already reported in this ACOP how has your organization supported the vision of RSPO to transform markets in other ways? (e.g. Funding; Engagement with key stakeholders; Business to business education/outreach)

In cooperation with the trade chains in Austria RSPO-certified Palm oil is always addressed positively.

Trademark Related

4.1 Do you use or plan to use the RSPO Trademark on your own brand of products?

No

Please explain why

In our market (Canada - Province of Québec), customer dont really known the RSPO Trademark. So this is not a significant added value for our Customer. We are working on new formulation of our product. The new formulation will not include palm oil.

No

Do you have any future plans to support independent smallholders?

No

Challenges

1 What significant economic, social or environmental obstacles have you encountered in the production, procurement, use and/or promotion of CSPO and what efforts did you make to mitigate or resolve them?

The cost of goods is the major issue that we have... Because our customers don't know about RSPO in our market, they are not willing to pay an added value for a product with the RSPO trademark.

2 In addition to the actions already reported in this ACOP how has your organization supported the vision of RSPO to transform markets in other ways? (e.g. Funding; Engagement with key stakeholders; Business to business education/outreach)

We are working on a new formulation of our product that will not include palm oil anymore. We plan to not buy palm oil in the future.

Challenges

1 What significant economic, social or environmental obstacles have you encountered in the production, procurement, use and/or promotion of CSPO and what efforts did you make to mitigate or resolve them?

In this present world economy every thing is subject to price which can affect availability. In our situation this has not been to bad an issue and which we can seem to work around within our current suppliers. There are always problems but working closely with our suppliers we can resolve them.

2 In addition to the actions already reported in this ACOP how has your organization supported the vision of RSPO to transform markets in other ways? (e.g. Funding; Engagement with key stakeholders; Business to business education/outreach)

Its more business to business education and learning from others working in the same kind of business as our own to help educate ourselves and other in the way of RSPO and its vision.

GHG Footprint

8.1 Are you currently reporting any GHG footprint?

No

Please state if you have any future plans to do so?

We are a small company of 4 persons and only hold an office. We don't produce ourselves and have our logistics and storage of our products outsourced to a distribution centre.
If our customers would request a GHG footprint from us, we will plan to do so.

Support for Smallholders

9.1 Are you currently supporting any independent smallholder groups?

No

Do you have any future plans to support independent smallholders?

No

Challenges

1 What significant economic, social or environmental obstacles have you encountered in the production, procurement, use and/or promotion of CSPO and what efforts did you make to mitigate or resolve them?

Not real obstacles, it seems more and more accepted to use RSPO certified products.

2 In addition to the actions already reported in this ACOP how has your organization supported the vision of RSPO to transform markets in other ways? (e.g. Funding; Engagement with key stakeholders; Business to business education/outreach)

We sell a lot of natural ingredients, therefore we try to promote not only RSPO certified products, but also ecocertified or organic products.

1 What significant economic, social or environmental obstacles have you encountered in the production, procurement, use and/or promotion of CSPO and what efforts did you make to mitigate or resolve them?

We are a very small organization and have not encountered anything like this. We strike to use sustainable palm and have taken made the palm oil pledge at ran.org.

2 In addition to the actions already reported in this ACOP how has your organization supported the vision of RSPO to transform markets in other ways? (e.g. Funding; Engagement with key stakeholders; Business to business education/outreach)

B2B education and awareness training of our staff

Support Smallholders

9.1 Are you currently supporting any independent smallholder groups?

No

Do you have any future plans to support independent smallholders?

No

Challenges

1 What significant economic, social or environmental obstacles have you encountered in the production, procurement, use and/or promotion of CSPO and what efforts did you make to mitigate or resolve them?

Customers are sometimes not receptive to the price increase of products because they contain sustainable RSPO oil, however, awareness is raised about social and environmental issues that lead to a levy to meet this requirement.

2 In addition to the actions already reported in this ACOP how has your organization supported the vision of RSPO to transform markets in other ways? (e.g. Funding; Engagement with key stakeholders; Business to business education/outreach)

The company doesn't have plans for any further actions at the moment.

No

Challenges

1 What significant economic, social or environmental obstacles have you encountered in the production, procurement, use and/or promotion of CSPO and what efforts did you make to mitigate or resolve them?

Our biggest obstacle has been suppliers unwillingness to become RSPO certified or only offering RSPO certified products that have ridiculously large minimum order quantities.

2 In addition to the actions already reported in this ACOP how has your organization supported the vision of RSPO to transform markets in other ways? (e.g. Funding; Engagement with key stakeholders; Business to business education/outreach)

As we work with our suppliers to become RSPO certified, we would like to have 100% certified oil on site.

Not now

Support for Smallholders

9.1 Are you currently supporting any independent smallholder groups?

No

Do you have any future plans to support independent smallholders?

No

Challenges

1 What significant economic, social or environmental obstacles have you encountered in the production, procurement, use and/or promotion of CSPO and what efforts did you make to mitigate or resolve them?

No one, on the contrary it was a plus

2 In addition to the actions already reported in this ACOP how has your organization supported the vision of RSPO to transform markets in other ways? (e.g. Funding; Engagement with key stakeholders; Business to business education/outreach)

Everytime, both with new and old clients, we show the importance of using certain kind of raw materials.

[This question is not applicable to RSPO Supply Chain Associates]

GHG Footprint

8.1 Are you currently reporting any GHG footprint?

No

Please state if you have any future plans to do so?

SACI-CFPA is engaged for CSR through Ecovadis - as a distributor we have a limited direct GHG footprint to transport (subject on which we work followed by KPIs) and we push the manufacturers we work with on the way to reduce GHG footprint

Support Smallholders

9.1 Are you currently supporting any independent smallholder groups?

No

Do you have any future plans to support independent smallholders?

No

Challenges

1 What significant economic, social or environmental obstacles have you encountered in the production, procurement, use and/or promotion of CSPO and what efforts did you make to mitigate or resolve them?

Economic essentially as customers would like to move to RSPO quality without price increasing - at that time we have focussed on mass balance quality in order to satisfy our customers. 80% of our involved sales are Mass balance RSPO.

2 In addition to the actions already reported in this ACOP how has your organization supported the vision of RSPO to transform markets in other ways? (e.g. Funding; Engagement with key stakeholders; Business to business education/outreach)

We support the vision of RSPO to transform markets by pushing the manufacturers we work with to use RSPO certified palm oil or palm oil derivatives in their process - in 2018 most of them have moved towards RSPO system and we continue to push the others. Our Japanese manufacturers who where the most difficult to convince are now moving to RSPO mass balance.

Challenges

1 What significant economic, social or environmental obstacles have you encountered in the production, procurement, use and/or promotion of CSPO and what efforts did you make to mitigate or resolve them?

For us the largest economic obstacle is cost of acquiring the RSPO C8 MCT Oil. the cost is about 300% more than non RSPO product, for us. This puts us at a big competitive disadvantage in terms of being able to have a competitive advertising budget. We consequently have developed market via weekly podcasts and a facebook group. The other obstacle was the time delay in obtaining RSPO certification for our manufactures. The communication was so slow that we went out of stock for about 6 weeks and that consequently cost us in lost market share. We know plan much further a head.

2 In addition to the actions already reported in this ACOP how has your organization supported the vision of RSPO to transform markets in other ways? (e.g. Funding; Engagement with key stakeholders; Business to business education/outreach)

By making sure all of our supply chain and end users know the value of being RSPO and all of it's ramifications.

[This question is not applicable to RSPO Supply Chain Associates]

GHG Footprint

8.1 Are you currently reporting any GHG footprint?

No

Please state if you have any future plans to do so?

Not at this time.

Support Smallholders

9.1 Are you currently supporting any independent smallholder groups?

Yes

If yes, how are you supporting them?

Thru the purchase of book & claim certificates.

Challenges

1 What significant economic, social or environmental obstacles have you encountered in the production, procurement, use and/or promotion of CSPO and what efforts did you make to mitigate or resolve them?

We have attempted to change our entire bakery production to sustainable palm oil, but we are not the largest customer the bakery has so we don't have the power/resources to go to a certified bakery. We are trying to learn who their largest client is so we can work with them to change to sustainable palm oil. The cost is prohibitive because we'd need separate storage containers and they'd have to drain the oil just to run our product. We would still not have the certifications we need in other countries because the entire bakery wouldn't be part of the chain even though we'd be using sustainable palm oil in the making of our product. There are no certified bakeries in the US that can make our product, but we search quarterly.

2 In addition to the actions already reported in this ACOP how has your organization supported the vision of RSPO to transform markets in other ways? (e.g. Funding; Engagement with key stakeholders; Business to business education/outreach)

We continue to engage customer and large organizations at our trade shows to educate them on the sustainable palm oil. We use our social media sites to highlight articles on the damage caused by non-sustainable palm oil production around the world.

Do you have any future plans to support independent smallholders?

No

Challenges

1 What significant economic, social or environmental obstacles have you encountered in the production, procurement, use and/or promotion of CSPO and what efforts did you make to mitigate or resolve them?

There is a very bad Reputation for Palm Oil in Europe. The anti-Palm Oil campain like in Italy and now in the EU need more support / PR from the big Palm Oil producing companies. The consumer must be informed about the Advantages of Palm Oil and more about the measure of RSPO concerning the improval of the working conditions and the stop of deforestation in Malaysia /Indonesia.

Challenges

1 What significant economic, social or environmental obstacles have you encountered in the production, procurement, use and/or promotion of CSPO and what efforts did you make to mitigate or resolve them?

Brexit may potentially impact on our ability to procure RSPO certified product as our specific ingredient will be coming from an EU state to a Non EU one in future. Tariffs may be imposed on cereal imports will effect our business also. Brexit will also impact our ability to employ people as we are in a border area and many of our existing staff regularly cross over and back each day to come and go home from work, the potential introduction of a hard border will discourage existing staff to travel over and back and reduce the appeal of others to apply for any jobs created.

2 In addition to the actions already reported in this ACOP how has your organization supported the vision of RSPO to transform markets in other ways? (e.g. Funding; Engagement with key stakeholders; Business to business education/outreach)

As a wholesale product, it is difficult for us to have an impact on the end user of it. Therefore our efforts are concentrated on using our existing customers to promote the product and the RSPO certified oil palm product as part of its usp. We made a decision as a company to only use certified oil palm product across our products even though buyers themselves may not be RSPO certified.

Trademark Related

4.1 Do you use or plan to use the RSPO Trademark on your own brand of products?

No

Please explain why

TasteTech products are sold business to business so we provide the chain of custody information required by the standard, informing our customers that RSPO MB Palm has been used, but do not include the RSPO trademark logo.

Actions for Next Reporting Period

5.1 Outline actions that you will take in the coming year to promote the use of RSPO certified sustainable palm oil and oil palm products along the supply chain

TasteTech promotes the use of sustainable palm oil containing products and we ensure that the chain of custody details are declared to all our customers.

Presently, all the palm oil used at TasteTech is RSPO certified as mass balance (MB). We remain keen to promote and move to fully segregated (SG) palm oil. However, it is still difficult to readily obtain double fractionated palm stearin with the same high melting point parameters as the MB palm oil presently used. We are working with our suppliers on this matter.

GHG Footprint

8.1 Are you currently reporting any GHG footprint?

No

Please explain why

Yes, TasteTech is looking at improving energy efficiency as part of our ISO 14001 standard. Our GHG footprint is known in terms of primary energy usage and improvements are being made.

Support for Smallholders

9.1 Are you currently supporting any independent smallholder groups?

No

Do you have any future plans to support independent smallholders?

No

Challenges

1 What significant economic, social or environmental obstacles have you encountered in the production, procurement, use and/or promotion of CSPO and what efforts did you make to mitigate or resolve them?

Overall, the trend from our customers in Europe is to replace palm oil with other vegetable oils. Customers that continue to permit the use of palm oil in their products increasingly request the SG Palm should be used. TasteTech has developed products that do not contain palm oil. We continue to support the use of certified palm oil and will move from MB to SG certified material as soon as it becomes readily available.

2 In addition to the actions already reported in this ACOP how has your organization supported the vision of RSPO to transform markets in other ways? (e.g. Funding; Engagement with key stakeholders; Business to business education/outreach)

In terms of palm oil, TasteTech only uses RSPO certified palm and we communicate this quality of the palm oil used to our customers. We only use palm oil refiners that are significant stakeholders in RSPO certified palm oil and TasteTech is an active member of SEDEX.

Challenges

1 What significant economic, social or environmental obstacles have you encountered in the production, procurement, use and/or promotion of CSPO and what efforts did you make to mitigate or resolve them?

The costs of complying with RSPO are largely disproportionate to the amount of palm oil actually used. All of our palm oil used is a minor ingredient of a compound ingredient and is only present in a few end products at less than 1% of total product. The cost of compliance has reduced profit levels as the retail market does not accept cost increases for certified products. This has also affected the profitability on non palm oil products as they subsidise these losses.

2 In addition to the actions already reported in this ACOP how has your organization supported the vision of RSPO to transform markets in other ways? (e.g. Funding; Engagement with key stakeholders; Business to business education/outreach)

We will continue to comply with the RSPO standards of trace-ability, segregation and staff training to maintain our certification as per our customers requirements.

Trademark Related

4.1 Do you use or plan to use the RSPO Trademark on your own brand of products?

No

Please explain why

No own Brands. Up to now we only produce retail products for third party (private label) and it's the final decision of the retail company to imprint the RSPO-Logo on the pouches we are producing for him. Currently our Customer is planning doing this (step by step at relaunch of packaging layouts). The trademark registration has already taken place. First Layout is finalized.

Challenges

1 What significant economic, social or environmental obstacles have you encountered in the production, procurement, use and/or promotion of CSPO and what efforts did you make to mitigate or resolve them?

In cases of procurements of certified palm we noticed that in the baking area there is a variety of vendors that can provide us with at least MB certified palm. Even raw materials that have been used for many years can usually be changed by the supplier at short notice and made available as certified. The hurdle is more the certification of all the entities involved in the supply chain. We see pent-up demand above all with the Trader and Distributer License.

2 In addition to the actions already reported in this ACOP how has your organization supported the vision of RSPO to transform markets in other ways? (e.g. Funding; Engagement with key stakeholders; Business to business education/outreach)

As we are a small company that processes only small quantities, we currently see our support for the RSPO through our membership and the pursuit of certified products when introducing new raw materials.

[This question is not applicable to RSPO Supply Chain Associates]

Trademark Use

4.1 Do you use or plan to use the RSPO trademark on your own brand products?

No

If target has not been met, please explain why:

Vicorquimia distributes RSPO products from third companies. Those products are commercialised under their same original brand names.

Actions for Next Reporting Period

5.1 Outline actions that you will take in the coming year to promote the use of RSPO certified sustainable palm oil and oil palm products along the supply chain

We will promote the sale of RSPO certified sustainable palm oil products to our customers offering them better prices.

GHG Footprint**8.1 Are you currently reporting any GHG footprint?**

No

Please state if you have any future plans to do so?

We are assessing the GHG emissions from our activity as it is a requirement of the ISO 14001 certification that we are implementing in our company this year.

Support for Smallholders**9.1 Are you currently supporting any independent smallholder groups?**

No

Do you have any future plans to support independent smallholders?

No

Challenges

1 What significant economic, social or environmental obstacles have you encountered in the production, procurement, use and/or promotion of CSPO and what efforts did you make to mitigate or resolve them?

RSPO certified palm oil products are more expensive, so we have had to adjust our profits and keep harder negotiations with our suppliers and customers.

2 In addition to the actions already reported in this ACOP how has your organization supported the vision of RSPO to transform markets in other ways? (e.g. Funding; Engagement with key stakeholders; Business to business education/outreach)

We collaborate with RSPO in order to promote environmental sustainability. We are implementing the ISO 14001 certification in our company as a measure of environmental care.

[This question is not applicable to RSPO Supply Chain Associates]

Trademark Related**4.1 Do you use or plan to use the RSPO Trademark on your own brand products?**

No

4.2 Please explain why

We do not produce our own brand for this product. Instead we purchase from other small holders and are requesting the use of the brand name.

Actions for Next Reporting Period**5.1 Outline actions that you will take in the coming year to promote the use of RSPO certified sustainable palm oil and oil palm products along the supply chain**

We have requested from our providers that they assure all product is RSPO certified and that they also begin to utilize the RSPO brand logo on their products. This should be standard on every product this year.

Reasons for Non-Disclosure of Information**6.1 If you have not disclosed any of the above information, please indicate the reasons why**

Other: Some of the data points do not pertain to our business. We have provided all information as it pertains to the product that we conduct business with. There are no palm oil related products that we deal with outside of the RSPO certified product previously mentioned.

Application of Principles & Criteria for all members sectors**7.1 Do you have organizational policies that are in line with the RSPO P&C, such as:**

[This question is not applicable to RSPO Supply Chain Associates]

7.2 What best practice guidelines or information has your organisation provided in the past year, to facilitate the uptake of RSPO certified sustainable palm oil and oil palm products? What languages are these guidelines available in?

Comment:

[This question is not applicable to RSPO Supply Chain Associates]

7.3 Your answers above indicate that you are not yet using 100% RSPO certified palm oil and oil palm products. Do you have plans to immediately cover the gap using Book & Claim?

[This question is not applicable to RSPO Supply Chain Associates]

GHG Footprint

8.1 Are you currently reporting any GHG footprint?

No

Please state if you have any future plans to do so?

We have no production or manufacturing at our facility. Being only a distribution, we have no traceable GHG pertaining to Palm oil.

Support Smallholders

9.1 Are you currently supporting any independent smallholder groups?

Yes

If yes, how are you supporting them?

By choosing to deal only with RSPO certified small holders, we are supporting those groups. We also openly refuse to trade products produced by non RSPO members.

Challenges

1 What significant economic, social or environmental obstacles have you encountered in the production, procurement, use and/or promotion of CSPO and what efforts did you make to mitigate or resolve them?

We have learned that there are many producers operating globally that are not and in some cases will not subject themselves to CSPO. This has at time made it difficult to source a dependable supply of palm oil. Demanding RSPO certification has helped a great deal with this.

2 In addition to the actions already reported in this ACOP how has your organization supported the vision of RSPO to transform markets in other ways? (e.g. Funding; Engagement with key stakeholders; Business to business education/outreach)

We have used the opportunity to reach out to the customers we supply to relay all information we have received from RSPO. We believe that the transfer of knowledge will help to continue to expand the program and reduce the number of non RSPO product on the market.

Challenges

1 What significant economic, social or environmental obstacles have you encountered in the production, procurement, use and/or promotion of CSPO and what efforts did you make to mitigate or resolve them?

The premium price of Mass Balance product sometimes is a concern by our clients. But we introduce the concept of Mass Balance and let them know why RSPO is important to us. So most of our clients understand the price difference,

2 In addition to the actions already reported in this ACOP how has your organization supported the vision of RSPO to transform markets in other ways? (e.g. Funding; Engagement with key stakeholders; Business to business education/outreach)

We have been introduced mass balance product to all our clients, and let them know the importance of it.
