## Challenges

**1 What significant economic, social or environmental obstacles have you encountered in the production, procurement, use and/or promotion of CSPO and what efforts did you make to mitigate or resolve them?**

The supply of our main raw material derived from palm, which is palm kernel stearin, is very difficult for a little company as we are : it's very difficult to find suppliers with available segregated palm kernel stearin and the premium price is hudge

---

**2 In addition to the actions already reported in this ACOP how has your organization supported the vision of RSPO to transform markets in other ways? (e.g. Funding; Engagement with key stakeholders; Business to business education/outreach)**

we are in contact from several years with WWF and we would like to use their contacts to be able to supply segregated palm kernel stearin and to work on a local program; but for the moment, even them cannot help us because of too little volumes
