Challenges

1 What significant economic, social or environmental obstacles have you encountered in the production, procurement, use and/or promotion of CSPO and what efforts did you make to mitigate or resolve them?

The costs of complying with RSPO are largely disproportionate to the amount of palm oil actually used. All of our palm oil used is a minor ingredient of a compound ingredient and is only present in a few end products at less than 1% of total product. The costs of compliance has reduced these products to loss makers as the retail market does not accept cost increases for certified products. This has also affected the profitability on non palm oil products as they subsidize these losses.

2 How would you qualify RSPO standards as compared to other parallel standards?

--

Cost Effective:

No

Robust:

Yes

Simpler to Comply to:

No

3 How has your organization supported the vision of RSPO to transform markets? (e.g. Funding; Engagement with key stakeholders; Business to business education/outreach)

We continue to support and comply with our certified RSPO status as required by our customers so they can promote their support for RSPO through their own branded product range.
