

SAMWORTH BROTHERS LTD - CALLINGTON SITE

ENVIRONMENTAL POLICY

At our Callington site, in line with our group policy, we are committed to high standards of environmental management as an integral part of our business activities in line with our corporate values of constant respect for 'People, Quality, Profit' (PQP) and continuous improvement.

This installation operates a process, which requires an Environmental Permit (formally Integrated Pollution Prevention and Control (IPPC) permit), under the Environmental Permitting (England & Wales) Regulations 2008.

We recognise our obligation to develop our commercial interests in ways, which minimise the impact on the environment and contribute to environmental conservation, enhancement and sustainability.

This policy was developed to achieve the following principles: -

1. To ensure that all activities carried out, meet, or wherever practicable, exceed, all legislation, standards and codes of practice.
2. To minimise waste by maximising the recovery of materials from waste wherever it is technically and economically viable to do so. This includes constant reviews of the opportunities for avoiding, reusing or recycling waste and thereby minimising landfill.
3. To reducing water usage through metering and water minimisation programmes.
4. Promoting reuse, recycling and the use of recycled materials.
5. Minimising to the fullest feasible and viable extent, the company's consumption of energy and fuel by efficient management, appropriate equipment specifications and operation and control.
6. To reduce or, wherever practicable, eliminate all harmful emissions to air, water or ground.
7. To work, wherever possible, with suppliers, contractors and customers who themselves have sound environmental policies.
8. To raise environmental awareness and understandings amongst all staff and encourage contribution of all employees towards improving and maintaining the company's environmental performance.

We aim to achieve these through the use of 'Best Available Techniques' (BAT) and 'Good Manufacturing Practices' (GMP).

This is achieved by setting annual environmental improvement objectives and targets, which are continuously monitored and reviewed.

This policy is reviewed on a regular basis and communicated to all employees. The policy is made available to our customers, suppliers, contractors and interested third parties.

Managing Director

Mark Duddridge
