INTERNATIONAL SUSTAINABILITY & CARBON CERTIFICATION POLICY

PT. Synergy Oil Nusantara is committed to produce biomass in a viable manner according to the International Sustainability & Carbon Certification (ISCC) system, by ensuring that the manufacturing process is sustainable, environmentally and socially sound.

Accordingly, PT. Synergy Oil Nusantara shall:-

* ensure the biomass is not produced on land with high biodiversity value such as forest land comprises of primary forests, areas for nature protection purposes designated by law or area for the protection of rare, threatened or endangered ecosystems.

* ensure the biomass is produced in an environmentally responsible way. This includes the protection of soil, water, air and also the implementation of Good Manufacturing Practice.

* ensure the biomass production does not violate human rights, labour rights or land rights. PT. Synergy Oil Nusantara shall promote responsible labour conditions and workers' health, safety and welfare and responsible community relations.

* ensure the biomass production takes place in compliance with all applicable regional and national laws and follows relevant international treaties.

* ensure Good Management Practice are being implemented.

* ensure critical control points such as biomass sourcing, logistics, inventory, sales and distribution, quality assurance etc. are as per ISCC system requirements.

* minimize greenhouse gas emission from biomass production, conversion processes and transportation.
