* Supply and Sales figures for 2014 represent the month this data published

*'Annual Production Capacity' = projected annual maximum volume processed by mills

*'Supply' = actual volume of CSPO/CSPKO produced

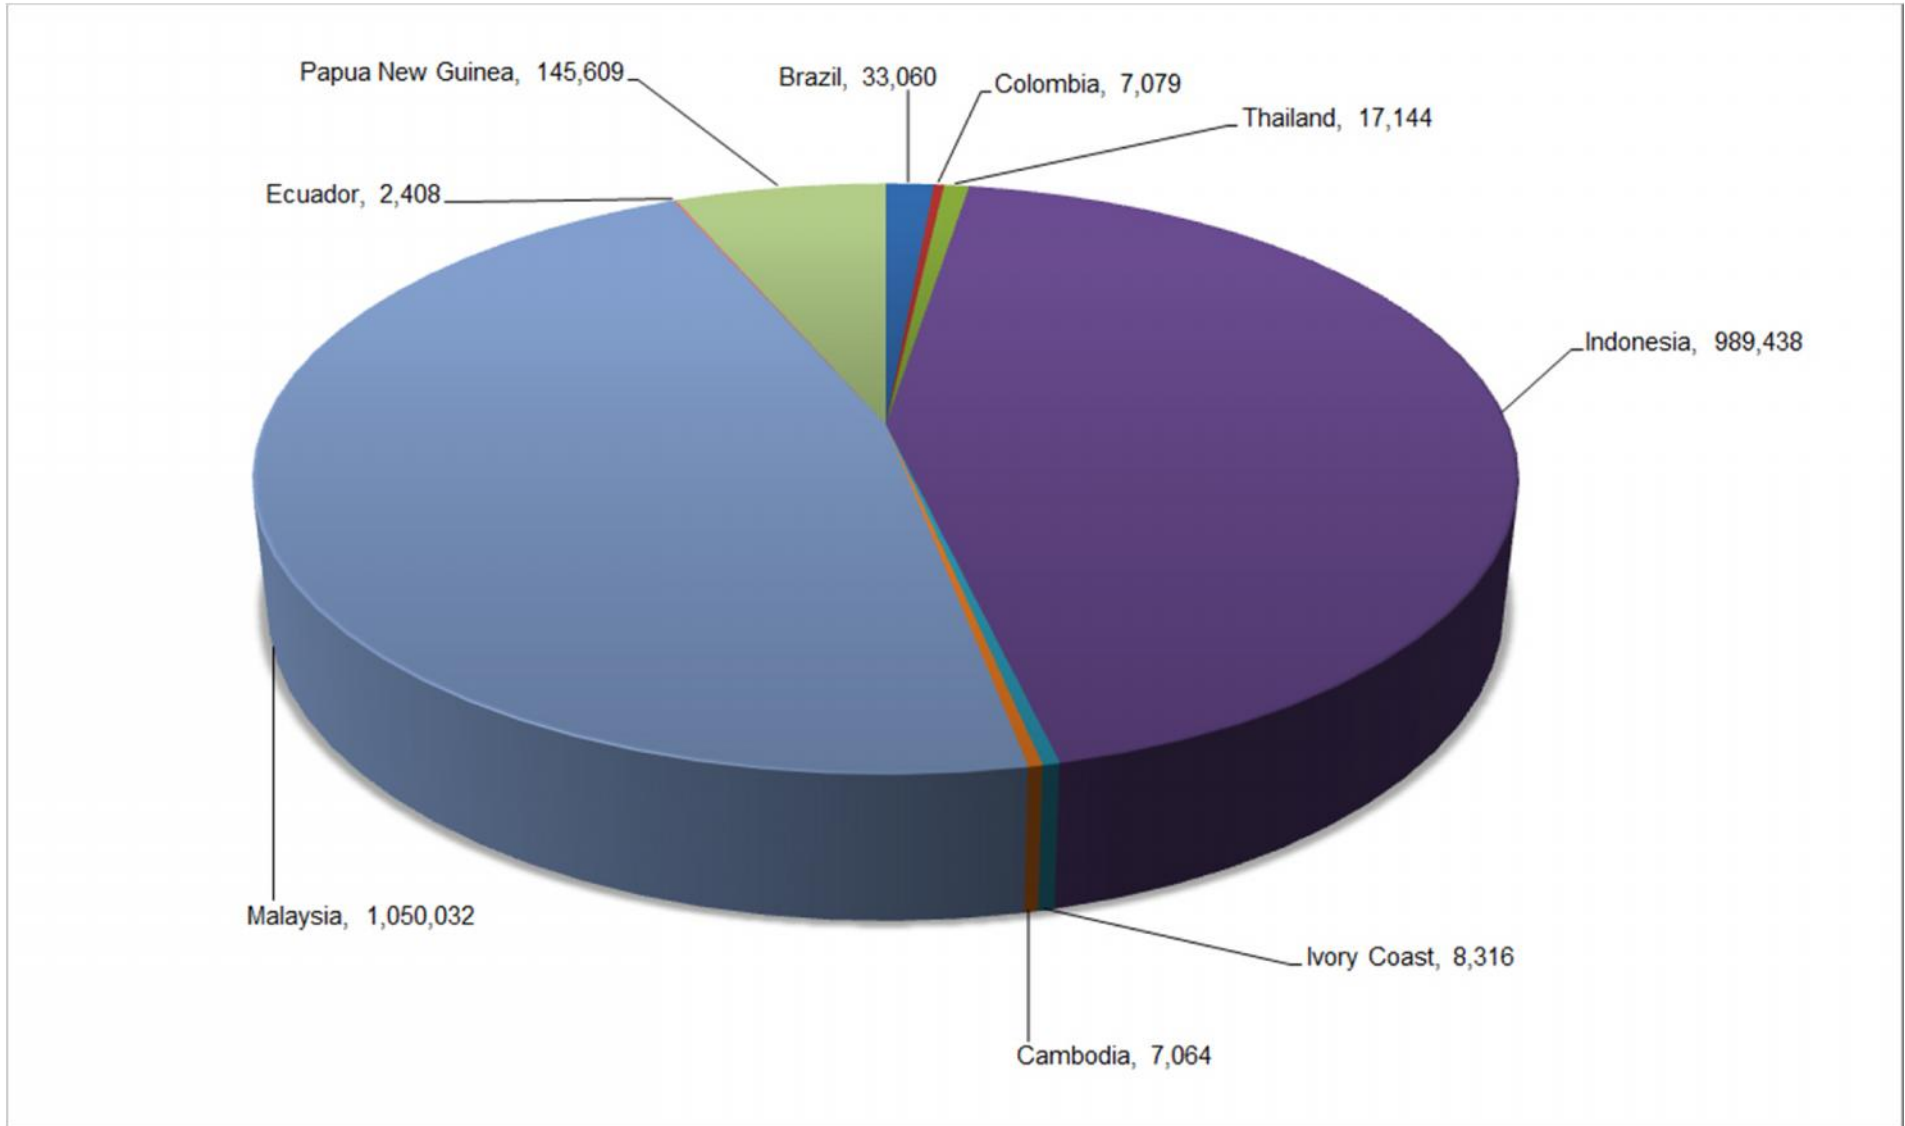

*'Production Area' = hectarage of area/supply base that comprises matured oil palm trees with fresh fruit bunches

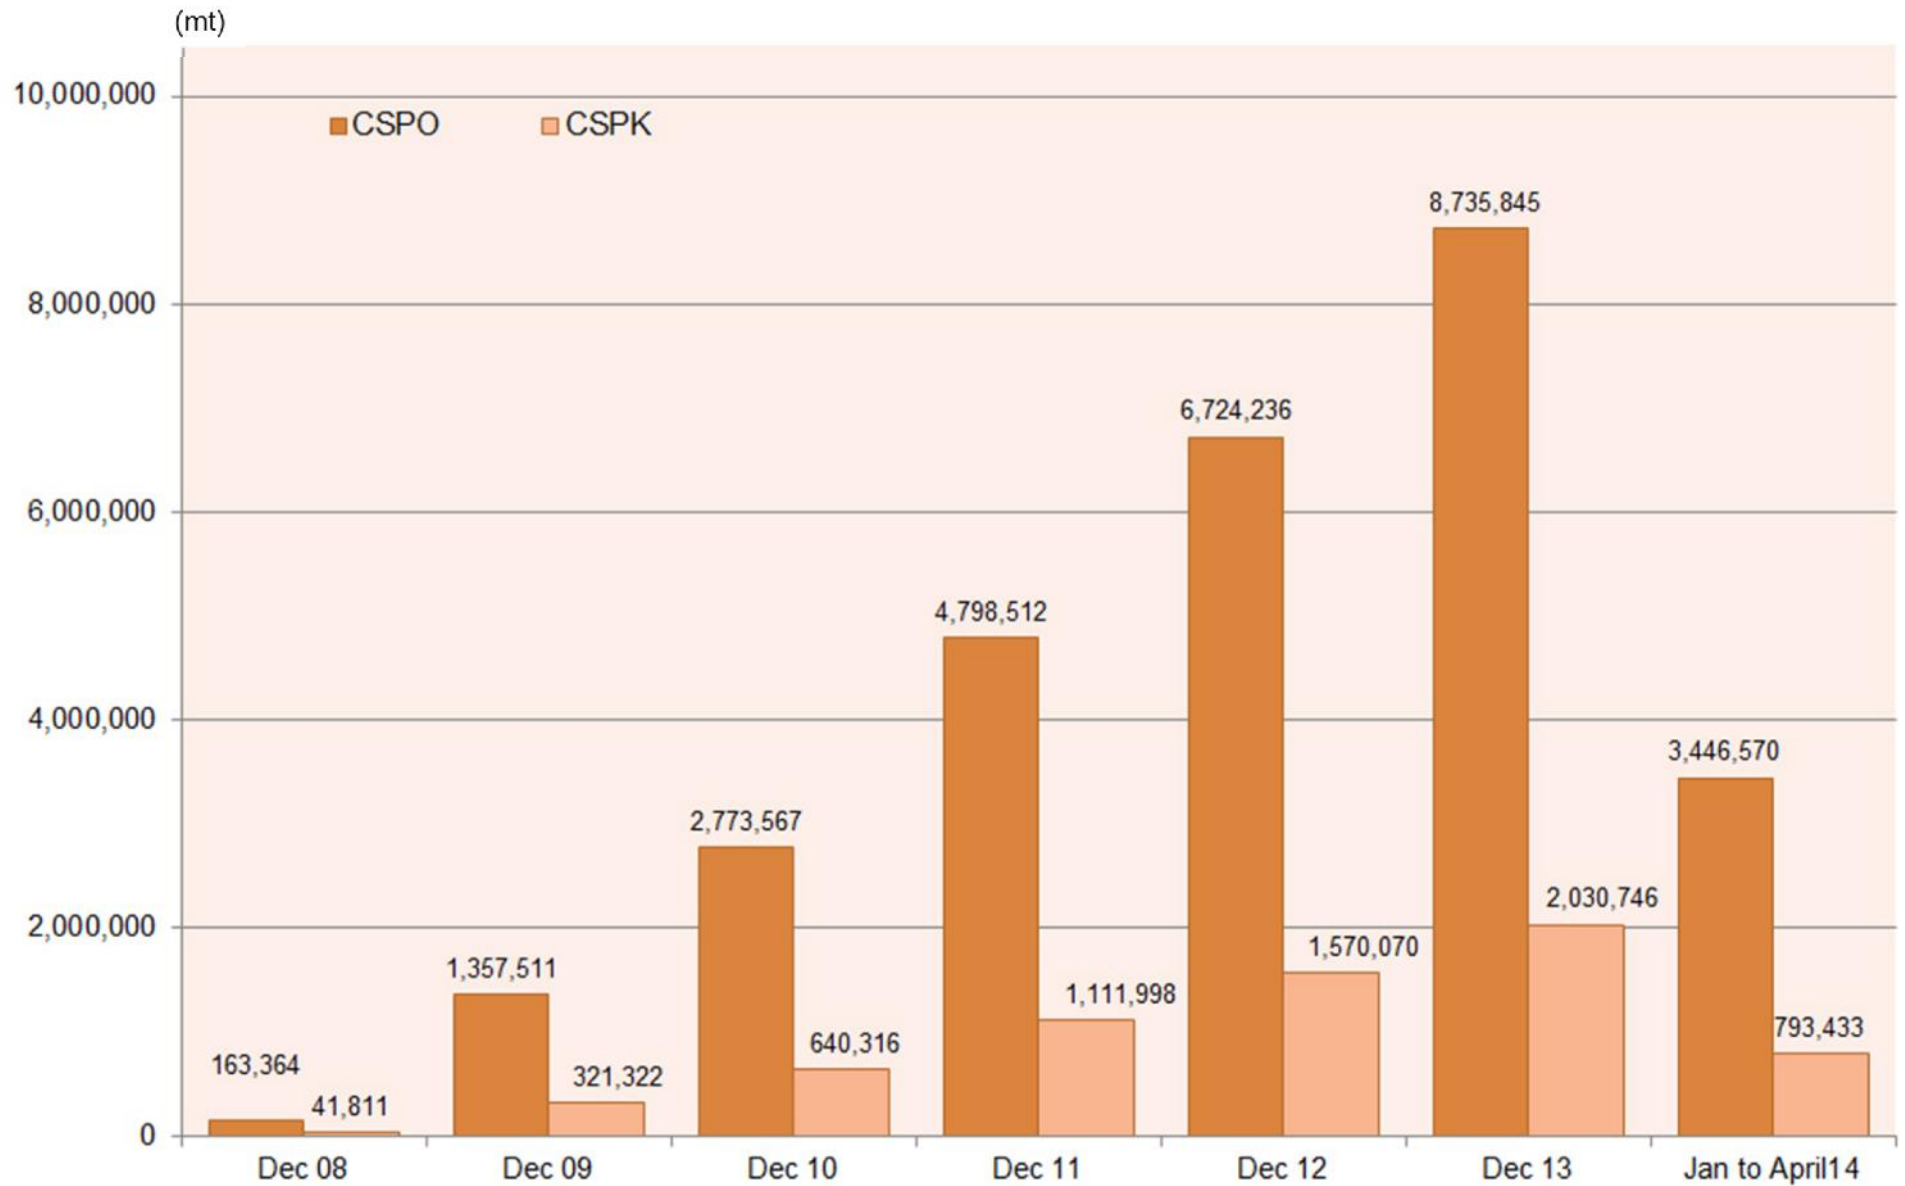

*'Certified Area' = hectarage of supply base/plantation that are certified which covers beyond production area i.e. immature areas (not yet producing fresh fruit bunches); non-plantable areas (swamps,slopes, etc.); infrastructure (offices; schools; employee centres, etc.); conservation area (set aside for High Conservation Value) etc.
