### Actions for Next Reporting Period

18 Outline actions that will be taken in the coming year to advance your plans for certification

- **i)** Progressive initiatives on smallholder projects such as the Smallholder and REDD Plan (SHARP).
- **ii)** Intensifying engagement activities, facilitation and support in terms of training, consultation and assistance for scheme smallholders in achieving RSPO Certification.
- **iii)** Commitment towards 100% RSPO Certification for all operations - maintenance of system and practices as well as compliance to the standards stipulated in the new RSPO P&C 2013.
19 Outline actions that will be taken in the coming year to promote sustainable palm oil

i) Creating awareness of plantation sustainability for public.

ii) Active participation in events/occasions promoting the use of sustainable palm oil.

iii) Promotion of sustainable palm oil conducted on business to business basis.

Challenges

1. Significant economic, social or environmental obstacles
   i) As producers, we wish to witness more uptake and obligations (encouraged by the RSPO) for the use/procurement of certified sustainable palm oil along the supply chain downstream. It will be a setback for growers/producers where excess of certified sustainable palm oil production is not being claimed as 'sustainable'.

2. How would you qualify RSPO standards as compared to other parallel standards?
   --

   Cost Effective:
   Yes

   Robust:
   Yes

   Simpler to Comply to:
   No

3. How has your organization supported the vision of RSPO to transform markets?
   i) Being the largest producer of certified sustainable palm oil (CSPO), SDP is strongly committed towards 100% sustainable palm oil production.
   ii) Engagement with key stakeholders on sustainability matters (e.g. SHARP for the development of smallholders).
   iii) Leading in sustainability initiatives and engaging the supply chain on sustainability efforts (e.g. active engagement with partners and customers downstream on sustainability matters).
