## **Challenges**

1. Significant economic, social or environmental obstacles

The challenge is to transform the local market. The market could do with basic support and guidance from RSPO. I can't over emphasise this point. We are finding it v difficult to find 'willing" CSPO oil suppliers and refiners who can supply 100 % mass balance and who can say this is what it is going to cost.

2. How would you qualify RSPO standards as compared to other parallel standards?		
Cost Effective:		
Yes		
Robust:		
Yes		
Simpler to Comply to:		
Yes		
3. How has your organization supported the vision of RSPO to transform markets?		
Engagement with various of our food suppliers and oil refiners as well as internal engagement with product development.
