Challenges

1 What significant economic, social or environmental obstacles have you encountered in the production, procurement, use and/or promotion of CSPO and what efforts did you make to mitigate or resolve them?

The implementation of the RSPO at all levels involves extensive investment with long-term results, the difficulty in this is that there is a base line to know what are the tangible benefits of the implementation of the RSPO in the country, as we are all palm oil companies in the same process. social level, producers have been working with old methodologies and have a great resistance to change that implementation of the RSPO involves. We have participated in conferences, we have attended meetings with environmental NGOs to provide information about the points of the RSPO standard and the implication of planting demarcated as protected area zones independent producers.

2 How would you qualify RSPO standards as compared to other parallel standards?

--

Cost Effective:

No

Robust:

Yes

Simpler to Comply to:

similar

3 How has your organization supported the vision of RSPO to transform markets? (e.g. Funding; Engagement with key stakeholders; Business to business education/outreach)

Agropalma has made alliances with the OEI in education with the aim of providing education to employees and members of the communities near the company that does not have the resources to access quality education, no age restriction.

Agropalma FUCAGUA made ??in conjunction with, which is an environmental NGO, to the conservation of the National Park and Calentura Capiro and made joint efforts to improve reforestation and the beaches of Trujillo.
