Actions for Next Reporting Period

7.1 Outline actions that you will take in the coming year to advance your plans for certification

DAABON is committed to the RSPO and mainstreaming its standard. We are committed to certifying medium sized independent farmers in our region and collaborate to certify companies that are not influenced by international requirements.

7.2 Outline actions that you will take to promote CSPO along the supply chain

1. We will keep the current certification agenda with new producers.
 2. DAABON will maintain its commitment to sale and trademark RSPO products.
 3. The company has pledged to the POIG and will include its complete supply chain to meet the RSPO standard.

Challenges

1 What significant economic, social or environmental obstacles have you encountered in the production, procurement, use and/or promotion of CSPO and what efforts did you make to mitigate or resolve them?

Producing sustainable palm oil in Colombia is more related to a cultural mindset than any technical, environmental or legal obstacle. We have found that implementation of standards at the smallholders level usually worries the management, the real challenge is at the mid-sized farmer. DAABON has approached with a teaching attitude, with the facts and numbers to convince on the risk and convenience of producing on a sustainable management system. This has worked, and we will keep fine tuning our proposal until the area is completely certified.

2 How would you qualify RSPO standards as compared to other parallel standards?

--

Cost Effective:

Yes

Robust:

Yes

Simpler to Comply to:

similar

3 How has your organization supported the vision of RSPO to transform markets? (e.g. Funding; Engagement with key stakeholders; Business to business education/outreach)

DAABON has invested for two years on having a seat at the BoG level as a representative for Latin America. This position has given us the possibility to help the region on its certification path. All of the companies in LA have, in one way or another, been helped/visited our system to replicate.
