## Challenges

### 1 What significant economic, social or environmental obstacles have you encountered in the production, procurement, use and/or promotion of CSPO and what efforts did you make to mitigate or resolve them?

- i) As producers, we wish to witness more uptake and obligations (encouraged by the RSPO) for the use/procurement of certified sustainable palm oil along the supply chain downstream. It will be a setback for growers/producers where excess of certified sustainable palm oil production is not being claimed as 'sustainable'.
- ii) Limitation in engaging accredited Certification Bodies due to hiccups in the accreditation process.

---

### 2 How would you qualify RSPO standards as compared to other parallel standards?

--

---

#### Cost Effective:

Yes

---

#### Robust:

Yes

---

#### Simpler to Comply to:

equal

---

### 3 How has your organization supported the vision of RSPO to transform markets? (e.g. Funding; Engagement with key stakeholders; Business to business education/outreach)

- i) Being the largest producer of certified sustainable palm oil (CSPO), SDP is strongly committed towards 100% sustainable palm oil production.
- ii) Engagement with key stakeholders on sustainability matters (e.g. SHARP for the development of smallholders).
- iii) Leading in sustainability initiatives and engaging the supply chain on sustainability efforts (e.g. active engagement with partners and customers downstream on sustainability matters).
- iv) Availability of fully segregated supply chain within the organization.
