6.2 Where relevant, what prevents you from trading/processing only CSPO?

The non availability of CS feedstock, and very limited supply of SG available in west Malaysia. Also most buyers not able to match the premium attached to CSPO, palm oil industry is relatively price sensitive especially in the emerging market

Commitments to CSPO uptake

As you don't source 100% CSPO through physical supply chains (IP/SG/MB), please answer the following questions: Do you have plans to?

No

Please explain why:

because there is limited supply of CSPO

7.1. Do you have plans to immediately cover the gap using Book & Claim?

Due to the premium and not many mills are register under Green-Palm programme

No

Challenges

1 What significant economic, social or environmental obstacles have you encountered in the production, procurement, use and/or promotion of CSPO and what efforts did you make to mitigate or resolve them?

Supply - not able to secure back to back supply that matches sales. Sellers prefer to sell nearby months, eg current sellers only want to sell May/June whereby buyers is looking for Oct/Nov/Dec)
Pricing - only handful of suppliers in peninsular to source for crude as suppliers prefer to sell refined products and reserve crude for their own consumption
