## Challenges

### 1 What significant economic, social or environmental obstacles have you encountered in the production, procurement, use and/or promotion of CSPO and what efforts did you make to mitigate or resolve them?

(1) Propaganda against Mass Balance and Book & Claim trading of CSPO, mounted by large plantation companies and by large corporate manufacturers who emphasise the essential importance of complete traceability, is damaging to sustainable small producers and small farmers attempting to sell their certified mass balance palm oil or green palm certificates in international markets. (2) Thailand's independent smallholders are converting their farms from other agricultural uses (eg. from coconuts, rubber etc). There is no clearing of forest land to plant oil palms in Thailand, and yet the cost and bureaucratic difficulty of achieving RSPO certification remains a major obstacle for these small independent growers. (3) With 87% of FFB produced by independent smallholders, and with such limited market incentives, smallholder certification is a costly challenge. Our company has assisted 187 independent smallholders to become RSPO certified and we have another 80 smallholders in the pipeline this year.

### 2 How would you qualify RSPO standards as compared to other parallel standards?

--

#### Cost Effective:

No

#### Robust:

Yes

#### Simpler to Comply to:

No

### 3 How has your organization supported the vision of RSPO to transform markets? (e.g. Funding; Engagement with key stakeholders; Business to business education/outreach)

Many media releases and conference presentations from our company highlighting importance of sustainability. About 80 groups of farmers, students and Govt officials visit the company's Oil Palm Research Center each year where RSPO and the importance of sustainability is explained. Participation in the RSPO Board of Governors and RSPO sponsored events throughout the year.

### 4 Other information on palm oil (sustainability reports, policies, other public information)

The public campaign against Mass Balance and Greenpalm Book & Claim supply chains and RSPO's public drive for only IP physical oil in important EU and North American markets is damaging to small producers and our smallholder suppliers. The "No Palm Oil Claims" by some RSPO manufacturers and retailer members is damaging to the RSPO brand in which we certified growers have invested so much.
