Actions for Next Reporting Period

7.1 Outline actions that you will take in the coming year to advance your plans for certification

We will start working on RaCP for PT.Indo Sawit Kekal with total conservation liabilities: 168.9 Ha after LUCA approval by RSPO on May 04, 2017. We will work in collaboration with 3rd party Environmental NGOs in order to maintain RSPO certificate for this location. PT.ISK has been certified since 2014

7.2 Outline actions that you will take to promote CSPO along the supply chain

We commit to protect peat greater that 65% organic matter regardless of depth in new developments. Where our existing plantations are on peat, we strongly encourage the implementation of the RSPO Manual on Best Management Practices

We contributed to the HCS Convergence Group and endorsed the alignment of HCS+ and HCSA methodologies addressing deforestation

Reasons for Non-Disclosure of Information

8.1 If you have not disclosed any of the above information, please indicate the reasons why

Support Smallholders
9.1 Are you currently supporting any independent smallholder groups?
Yes

9.2 How are you supporting them?
In Malaysia, we have certified 175 independent smallholders for RSPO in Air Kuning Perak, as part of the Wild Asia Group Scheme (WAGS). In Colombia, we signed off on a project that will support the RSPO certification of 487 independent smallholders. We also support smallholders through the development of best practice guidelines to guide replanting and alternative livelihood development on peat areas.

Comment:
We will continue to offer and supply RSPO certified products based on customer demand. Our customers want more customization with respect to traceability for their specific supply chain and despite the complexity, we continue to work to find ways to improve tracking and reporting at origin. Cargill is committed towards a 100% transparent, traceable and sustainable palm supply chain by 2020. Our policy is rooted in the Principles and Criteria of the Roundtable on Sustainable Palm Oil (RSPO) and we believe they serve as the primary global sustainability standards for palm products and encourage all end-users of palm oil and palm oil products in the mature markets.

3.5 Which countries that your organization operates in do the above own-brand commitments cover?
Australia, Belgium, Brazil, China, Germany, India, Indonesia, Malaysia, Netherlands, Russian Federation, Singapore, United Kingdom, United States

3.6 How do you proactively promote RSPO and RSPO certified sustainable palm oil and oil palm products to your customers?

a) We regularly communicate our efforts on sustainability and RSPO to our customers
b) We offer customers the option to utilize the RSPO segregated or mass balance supply chain models
c) We are actively involved in the organization of several industry events, as we are present as a speaker on multiple occasions to share our vision on how to achieve sustainable palm in the palm supply chain.
d) We have signed up for the different EU market initiatives to stimulate the uptake of the sustainable palm among the local manufacturers and users of palm oil, either directly or via the association that we are member of.

Trademark Use

4.1 Do you use or plan to use the RSPO trademark on your own brand products?
Yes

Please state the markets where you intend to apply the Trademark and when you plan to start
Based on customer demand

Actions for Next Reporting Period

Refer inputs to 9.1 in oil palm growers section
Challenges

1 What significant economic, social or environmental obstacles have you encountered in the production, procurement, use and/or promotion of CSPO and what efforts did you make to mitigate or resolve them?

a) Availability of CSPO is challenging for standalone refiners to secure supply to meet customer demand b) Lack of awareness among the independent estates, smallholders and mills about RSPO. c) Difficult for smaller users to embark on supply chain certification because of lack of resources d) Transparency to independent small holder base due to presence dealers, making it more difficult to engage on issues e) Lack of market transparency at smallholder level which doesn’t encourage certification or reduce bargaining power f) Customer need to increase uptake of CSPO

2 How has your organization supported the vision of RSPO to transform markets? (e.g. Funding; Engagement with key stakeholders; Business to business education/outreach)

We have regular engagement with suppliers, customers, smallholders, and NGOs on our palm sustainability practices and actions. In Jan 2017, an additional 141 smallholders were group certified in Malaysia through smallholder programme in partnership with Wild Asia to raise the capability of smallholders to RSPO standards. This brings the total number of RSPO-certified independent smallholders under the WAGS to 175. We are also mapping our palm oil supply chain and work on continuous sustainability improvement programmes with key suppliers. High level engagements to understand the suppliers’ approaches to sustainability and responsible sourcing. The goal is transparency and ensuring progress. Cargill is continuing to make progress to reach its sustainable palm oil commitments. Since we issued our 2014 action plan, some major accomplishments include: a) We completed our first high carbon stock (HCS) assessment at our PT Hindoli plantation and started a second assessment of a third party supplier. b) In Q4 2015, the company had reached 97% traceability to mill level (98% for kernel and 96% for palm). c) We completed 10 planned field assessments of suppliers, and an eleventh was adapted into a supplier workshop. Key learning and challenges: a) Globally, we are working to build and improve our relationships with smallholders to increase transparency and improve traceability. We learned that active engagement with smallholders across the supply chain is critical to ensuring voluntary reporting. b) We committed to sponsoring three HCS assessments at third-party concessions. The first was delayed but is now in progress; the other two are pending the selection of suppliers to participate c) While we launched our new Palm Grievance Procedure as an important avenue to engage and hold accountable suppliers, and we will file, review and monitor any allegations through the process, we still see opportunities to further increase transparency in 2016. d) Our customers want more customization with respect to traceability for their specific supply chains and despite the complexity, we continue to work to find ways to improve tracking and reporting at origin. e) One of the challenges ensuring traceability to the plantation is the need to work through intermediaries, such as traders, which adds to the complexity of the supply chain and makes it more difficult to engage with smallholders directly, some of whom we have not historically had direct interactions.
