GHG Emissions

6.1 Are you currently assessing your operational GHG emissions?

Yes

Description: Operational GHG emissions have been monitored and assessed since 2009 using our Sustainability Management System (SMS); an in-house cloud based system based on WRI’s GHG protocol. Starting 2016, we have fully adopted the use of PalmGHG for upstream operations and SMS for downstream operations. No file was uploaded

Actions for Next Reporting Period

7.1 Outline actions that you will take in the coming year to advance your plans for certification

i) Intensifying engagement activities, facilitation and support in terms of training, consultation and assistance for schemed and independent smallholders/ smallgrowers in achieving RSPO certification, and sharing of experience in achieving RSPO certification with our customers. ii) Commitment towards 100% RSPO Certification for all operations - maintenance of system and practices as well as compliance to the standards stipulated in the new RSPO P&C 2013 and respective countries’ new National Indicators.

7.2 Outline actions that you will take to promote CSPO along the supply chain

i) Creating awareness of plantation sustainability and promotion of sustainable palm oil for business partners, customers and the public. ii) Active participation and contribution in events/occasions promoting the use of sustainable palm oil.

Reasons for Non-Disclosure of Information

8.1 If you have not disclosed any of the above information, please indicate the reasons why

Support Smallholders

9.1 Are you currently supporting any independent smallholder groups?

Yes

9.2 How are you supporting them?

In striving towards including more certified smallholders in our supply chain, we partnered with Wild Asia (WA), a Malaysian-based social enterprise through a MOU to assist small oil palm producers in the Lower Kinabatangan area in Sabah in achieving RSPO certification. This collaboration aims to secure the supply of oil palm Fresh Fruit Bunch (FFB) from small producers including certified small producers FFB under the Wild Asia Group Scheme (WAGS). We hope that this partnership will significantly increase the participation of smallholders in our sustainable supply chain.
Challenges

1 What significant economic, social or environmental obstacles have you encountered in the production, procurement, use and/or promotion of CSPO and what efforts did you make to mitigate or resolve them?

   i) As producers, we wish to witness more uptake and obligations (encouraged by RSPO) for the use/procurement of certified sustainable palm oil along the supply chain downstream. ii) We also noted that there has been limitation in engaging accredited Certified Bodies for our certifications due to hiccups in the accreditation process.

2 How has your organization supported the vision of RSPO to transform markets? (e.g. Funding; Engagement with key stakeholders; Business to business education/outreach)

   i) Being the largest producer of certified sustainable palm oil (CSPO), SDP is strongly committed towards 100% sustainable palm oil production and fully segregated supply chain within the organization. ii) We have been leading sustainability initiatives and engaging the supply chain on sustainability efforts through active engagement with our stakeholders. iii) We engage our stakeholders to discuss on sustainability topics (including RSPO, environmental and social issues) through multiple channels. Our key stakeholder groups have been identified through various activities in the palm oil industry. They include shareholders, customers, NGOs, government agencies and industry groups. Our approach is not only through formal meetings, but through informal means e.g. surveys, websites, social media and market research.
