Trademark Related

4.1 Do you use or plan to use the RSPO Trademark on your own brand of products?

No

Please explain why

We do use either the UTZ or the Fairtrade label on the packaging of our own brand products. The huge amount of sustainability labels lead to confusion for the end consumer. Using more label on our packaging would mean even more confusion. Therefore, we currently use the RSPO Trademark for our private label products when it is requested by the customer.

Actions for Next Reporting Period

5.1 Outline actions that you will take in the coming year to promote the use of RSPO certified sustainable palm oil and oil palm products along the supply chain

All our customers were informed that we exclusively use RSPO certified palm oil and palm kernel oil. We try to inspire those who are not yet members of the RSPO to join. Furthermore, we promote the issue RSPO on our website and also on our company brochure.

Reasons for Non-Disclosure of Information

6.1 If you have not disclosed any of the above information, please indicate the reasons why

Other

- Others:

To split up the Palm (kernel) oil volume used in our own brands and private Label brands that are sourced through RSPO certified physical supply chain would be very complex and time intensive as an automatic analysis of the data is not possible. This is the reason why we did not respond to Point 2.3 and Point 2.4.

7.2 What best practice guidelines or information has your organization provided in the past year to facilitate the uptake of RSPO certified sustainable palm oil and oil palm products? What languages are these guidelines available in?

Comment:

We have formulated an internal procedure that describes the requirements to be met when using RSPO certified palm oil. Based on this instruction, new colleagues can get information about RSPO. They learn more about the requirements of the RSPO standard and how we comply with them. The instruction is available in German and English.

Since the document contains sensitive company data, it is not possible to upload it.

Challenges

1 What significant economic, social or environmental obstacles have you encountered in the production, procurement, use and/or promotion of CSPO and what efforts did you make to mitigate or resolve them?

At the moment, we are converting the palm oil-containing raw materials from Mass Balance to Segregated. We sometimes encounter the problem that the necessary raw materials can not yet be delivered in Segregated; especially the flavours. Often, we get the statement from our suppliers that the demand for a changeover is not enough or if then at much much higher cost. In order to meet our goals, we need to find an alternative raw material in Segregation in discussion with the supplier. If this is not possible, we will deviate to another supplier, if necessary. In principle, however, we welcome the willingness of the suppliers to cooperate on this topic.

2 In addition to the actions already reported in this ACOP how has your organization supported the vision of RSPO to transform markets in other ways? (e.g. Funding; Engagement with key stakeholders; Business to business education/outreach)

We do not undertake further actions than those described in the ACOP.
