3.2 Year expected to/or started to handle/trade/process any RSPO-certified palm oil and oil palm products

2017

If target has not been met, please explain why:

We started to trade (not physically handling, it is direct shipment from RSPO certified producer to RSPO certified customers) almost immediately after obtaining our Traders License and membership from RSPO.

3.3 Year expected to achieve 100% RSPO certification of all palm product processing facilities***If target has not been met, please explain why:**

Chemical Mate is a trading company, we perform direct shipments sales from supplier (manufacturer) shipping directly to the customer. We do not handle the products physically and we are not a manufacturer or re-packer ourselves.

3.4 Year expected to only handle/trade/process 100% RSPO-certified palm oil and oil palm products**If target has not been met, please explain why:**

As we are only a Trading Company, we will follow closely the directions of our customers and manufacturers, and the industry direction. Our preference is also to trade 100% RSPO certified material, however the decision to use 100% RSPO MB Certified material is still a subject of cost acceptance by our customers balancing with their economic objectives. Financially and Operationally we are already well prepared to trade and support 100% RSPO MB Certified material as long as the cost is possible to be passed on to the Customer.

Cost is still a driving factor for customers. We have several times subsidized margins to compensate for the additional cost of RSPO Certified material cost increase.

2 In addition to the actions already reported in this ACOP how has your organization supported the vision of RSPO to transform markets in other ways? (e.g. Funding; Engagement with key stakeholders; Business to business education/outreach)

Business to Business discussions with customers, purchasers who are still unfamiliar with RSPO Certification option, rather than seeking "palm free" alternatives.
