|   |  |

#### Challenges

1 What significant economic, social or environmental obstacles have you encountered in the production, procurement, use and/or promotion of CSPO and what efforts did you make to mitigate or resolve them?

Financial premiums structure and lack of commitment by many customers toward supporting financial implications. Education and long term sustainable supply outlook discussions are currently our only tool toward educating customers and mitigating internal financial burden/risk.

2 In addition to the actions already reported in this ACOP how has your organization supported the vision of RSPO to transform markets in other ways? (e.g. Funding; Engagement with key stakeholders; Business to business education/outreach)

Numerous business to business educational sessions with customers on RSPO and CPSO models, supporting them thru registration procedures of joining, and providing certain customers with detailed tracking/use information on their respective CSPO quantities.

3 File -Please attach or add links to any other information from your organisation on your policies and actions on palm oil (EG: sustainability reports, policies, other public information)
