### Challenges

1 What significant economic, social or environmental obstacles have you encountered in the production, procurement, use and/or promotion of CSPO and what efforts did you make to mitigate or resolve them?

RSPO products cost more making our products more expensive. Small volumes used lead to supply/ logistics management issues. Problems dealt in alignment with palm oil strategic partners.

2 In addition to the actions already reported in this ACOP how has your organization supported the vision of RSPO to transform markets in other ways? (e.g. Funding; Engagement with key stakeholders; Business to business education/outreach)

alignment with customers so as to understand/ satisfy current and future needs in palm oil use, based on our contractual agreements
