Challenges

1 What significant economic, social or environmental obstacles have you encountered in the production, procurement, use and/or promotion of CSPO and what efforts did you make to mitigate or resolve them?

The additional cost implication of CSPO products is a major hindrance towards growth. Though there is an awareness of benefits of CSPO, customers are still buy conventional oil considering the highly price sensitive Indian market. As a refinery we have optimized our processing costs so as to give the best price to our customers.

2 In addition to the actions already reported in this ACOP how has your organization supported the vision of RSPO to transform markets in other ways? (e.g. Funding; Engagement with key stakeholders; Business to business education/outreach)

Our focus has been on engaging with our key customers - we have highlighted the benefits of RSPO products - we have arranged for factory visits to ensure that they are satisfied with our capabilities - we have provided clarity to their doubts with regards to the product technicalities / application.
