Challenges

1 What significant economic, social or environmental obstacles have you encountered in the production, procurement, use and/or promotion of CSPO and what efforts did you make to mitigate or resolve them?

The biggest challenge to promotion of RSPO certified palm products is the strong resistance of our Western country aligned customers to share the additional costs of Certified products. They want RSPO certified product to be supplied at the same price as uncertified product. This resistance is our big challenge.

2 In addition to the actions already reported in this ACOP how has your organization supported the vision of RSPO to transform markets in other ways? (e.g. Funding; Engagement with key stakeholders; Business to business education/outreach)
