WAGS is a group scheme supporting independent smallholders.

## Challenges

**1 What significant economic, social or environmental obstacles have you encountered in the production, procurement, use and/or promotion of CSPO and what efforts did you make to mitigate or resolve them?**

Securing core funding to expand the technical support to our various models across Malaysia, or even overseas. Our model for smallholder support also departs from existing models and thus it is difficult for donors to appreciate the impact of this innovation to smallholders. We are working on extending the communication of our work through RSPO events in order to improve the understanding of our model. There is also a challenge to translate certified products into sales revenue that can cover the cost of certification and technical support. This is an area that needs more attention or to identify potential partners that can help us develop a more realistic financial model to continue to support the smallholders.

---

**2 In addition to the actions already reported in this ACOP how has your organization supported the vision of RSPO to transform markets in other ways? (e.g. Funding; Engagement with key stakeholders; Business to business education/outreach)**

We are active in assisting different supply chain actors and solutions to either meet the RSPO standards or to find ways to resolve bottlenecks in the supply of RSPO products into the supply chain
