Cemoi quality policie extract :

"Filling of certain CEMOI products may contain various vegetable fats, including palm oil.

Palm oil is used in confectionery products for its technological and organoleptic properties. It has points and crystallization profiles which give it specific technical properties and organoleptic characteristics.

- 100% of the palm oil supply to CEMOI France Group is certified RSPO according to the segregated certification scheme. Substitution by vegetable fats of type:
- Non-tropical: is not possible without impact on the organoleptic and technological aspects of our fillings because they do not have solid fractions.
- Tropical: goes against the actions put in place and carried out by the Cémoi Group on the development of sustainable and traced pathways."
